

AS/NZS 4812:2003

AS/NZS 4812

Australian/New Zealand Standard™

**Non-destructive examination and
discard criteria for wire ropes in mine
winding systems**

AS/NZS 4812:2003

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME-018, Mining Equipment. It was approved on behalf of the Council of Standards Australia on 13 December 2002 and on behalf of the Council of Standards New Zealand on 13 December 2002. It was published on 24 February 2003.

The following are represented on Committee ME-018:

Australasian Institute of Mining and Metallurgy
Australian Chamber of Commerce and Industry
Australian Coal Association
Bureau of Steel Manufacturers of Australia
Chamber of Mines of Western Australia
Department of Labour, New Zealand
Department of Infrastructure, Energy and Resources, Tasmania
Department of Mineral Resources NSW
Department of Minerals and Energy WA
Department of Mines and Energy, Qld
Department of Natural Resources and Environment, Victoria
Institution of Engineers Australia
Institution of Mining Engineers, Australia
Minerals Council of Australia
South Australian Chamber of Mines and Energy

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-018, Mining Equipment.

The Standard is intended to promote the safe use of wire ropes for mine winding systems.

The following documents were referred to when drafting this Standard:

AS 1929 Non-destructive testing—Glossary of terms

AS 2759 Steel wire rope—Application guide

AS 3569 Steel wire ropes

AS 3978 Non-destructive testing—Visual inspection of metal products and components

ASTM E1571 Standard practice for electromagnetic examination of ferromagnetic steel wire rope

MDG No. 26 Guidelines for examination, testing and retirement of mine winder ropes for use in coal mines—Department of Mineral Resources, N.S.W.

SABS 0293:1996 Condition assessment of steel wire ropes on mine winders

Techniques to better exploit the possibilities of wire testing with permanent magnet equipped EM instruments—Canmet Noranda Project 1990—1992

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	4
1.2 REFERENCED DOCUMENT	4
1.3 DEFINITIONS	4
SECTION 2 NON-DESTRUCTIVE EXAMINATION (NDE)	
2.1 EXAMINERS	6
2.2 EM INSTRUMENTS	6
2.3 CALIBRATION	8
2.4 ROPE EXAMINATIONS	8
SECTION 3 ROPE DISCARD CRITERIA	
3.1 GENERAL	14
3.2 WINDING ROPES, INCLUDING BALANCE ROPES	14
3.3 GUIDE ROPES AND RUBBING ROPES	15
APPENDICES	
A PRINCIPLES FOR OPERATING NDT EQUIPMENT	17
B VISUAL ACUITY	19
C TYPICAL WORK SHEET	20
D USEFUL TECHNIQUES FOR DETERMINING AREA RELATIONSHIPS	22
E METHOD FOR CLASSIFYING CORROSION AND WEAR	25
F MEASURING THE DIAMETER OF ROPE	26
