This Standard was issued in draft form for comment as DR 03360.

Originated as AS/NZS 4360:1995.  
Second edition 1999.  
Third edition 2004

#### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

# Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee OB-007, Risk Management as a revision of AS/NZS 4360:1999, *Risk management*. It provides a generic framework for establishing the context, identifying, analysing, evaluating, treating, monitoring and communicating risk.

This revised Standard incorporates the insights gained through the application of the 1999 edition, and current thinking on risk management.

Some of the changes from the 1999 edition include—

- greater emphasis on the importance of embedding risk management practices in the organization's culture and processes;
- greater emphasis on the management of potential gains as well as potential losses; and
- moving and expanding indicative examples into a new handbook.

HB 436, *Risk Management Guidelines—Companion to AS/NZS 4360:2004* contains specific guidance on the implementation of the Standard. The two documents are intended to be used together.

In addition, Standards Australia and Standards New Zealand have published a range of handbooks on the way the risk management process can be applied in a variety of sectors and a range of subject areas.

# Contents

1	Scope and general .....	1
1.1	Scope and application .....	1
1.2	Objective .....	1
