AS/NZS 60079.29.2:2016 IEC 60079-29-2, Ed.2.0 (2015)

Australian/New Zealand Standard™

Explosive atmospheres

Part 29.2: Gas detectors—Selection, installation, use and maintenance of detectors for flammable gases and oxygen

AS/NZS 60079.29.2:2016

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-014, Equipment for Explosive Atmospheres. It was approved on behalf of the Council of Standards Australia on 26 October 2015 and on behalf of the Council of Standards New Zealand on 12 February 2016. This Standard was published on 5 April 2016.

The following are represented on Committee EL-014:

Auckland Regional Chamber of Commerce Australian Chamber of Commerce and Industry Australian Industry Group Australian Institute of Petroleum Australian Petroleum Production and Exploration Association Australian Pipeline and Gas Association Aviation and Marine Engineers Association Bureau of Steel Manufacturers of Australia Department of Natural Resources and Mines, Qld Department of Trade and Investment, NSW **Electrical Compliance Testing Association** Electrical Contractors Association of New Zealand **Electrical Regulatory Authorities Council** Engineers Australia Institute of Electrical Inspectors Institute of Instrumentation, Control & Automation Australia Institution of Professional Engineers New Zealand Mining Electrical and Mining Mechanical Engineering Society Ministry of Business, Innovation and Employment, New Zealand University of Newcastle WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 60079.29.2:2015.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-014, Equipment for Explosive Atmospheres, to supersede AS/NZS 60079.29.2:2008.

The objective of this Standard is to provide guidance on, and recommended practice for, the selection, installation, safe use and maintenance of electrically operated group II equipment intended for use in industrial and commercial safety applications and group I equipment in underground coal mines for the detection and measurement of flammable gases complying with the requirements of AS/NZS 60079.29.1 or AS/NZS 60079.29.4.

This Standard is identical with, and has been reproduced from IEC 60079-29-2, Ed.2.0 (2015), *Explosive atmospheres*, Part 29-2: Gas detectors—Selection, installation, use and maintenance of detectors for flammable gases and oxygen. Changes to the Standard introduced by this edition are listed in the IEC Foreword.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text 'this part of IEC 60079-29' should read 'this part of AS/NZS 60079.29'.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards. The replacements at the time of publication are detailed in the following table but reference to the latest Australian or Australian/New Zealand Standard should be applied for any revisions after the publication of this Standard.

Only normative references that have been adopted as Australian or Australian/New Zealand Standard have been listed.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the annex to which they apply. A 'normative' annex is an integral part of a Standard, whereas an 'informative' annex is only for information and guidance.

CONTENTS

1	Scop	e	. 13
2	Normative references		14
3	Terms and definitions		14
	3.1	Gas properties and other physics	14
	3.2	Types of equipment	16
	3.3	Sensors and detectors	18
	3.4	Supply of gas to instruments	19
	3.5	Signals and alarms	19
	3.6	Times, checks and equipment behaviour	20
	3.7	Terms exclusive to open path equipment	21
4	4 Basic information on the properties, behaviour, gases and vapours, and spe- applications of gas detection		23
	4.1	Detecting gases and vapours	23
	4.1.1	General	23
	4.1.2	Safety when monitoring for flammable gases where personnel could be present	24
	4.2	Some common properties of gases and vapours	25
	4.3	The differences between detecting gases and vapours	26
	4.3.1	General	26
	4.3.2	Detection of gases	26
	4.3.3	Detection of vapours	28
	4.4	Oxygen deficiency	31
	4.4.1	General	31
	4.4.2	Chemical reaction of oxygen, with solid products	31
	4.4.3	Chemical reaction of oxygen, with gaseous products	31
	4.4.4	Dilution of the air by displacement by some other gas or vapour	32
	4.5	Specific applications of gas detection	32
	4.5.1	Gas detection as means of reducing risk of explosion	32
	4.5.2	Gas free work permit	. 35
	4.5.3	Monitoring of air inlets	36
_	4.6	Specific considerations for open path detection	36
5	Meas	suring principles	37
	5.1	General	37
	5.2	Catalytic sensors	39
	5.2.1	General	39
	5.2.2	Common applications	39
	5.2.3	Limitations	39
	5.2.4	Interferences	40
	5.2.5	Poisoning	40
5.3 Ther		I nermal conductivity sensors	41
	5.3.1		41
	5.3.2	Common applications	41
	5.3.3		41
	5.3.4	Interrences	41
