AS IEC 60300.3.11—2011

Australian Standard[®]

Dependability management

**Part 3.11: Application guide—Reliability
centred maintenance**

This Australian Standard® was prepared by Committee QR-005, Dependability. It was approved on behalf of the Council of Standards Australia on 19 October 2011. This Standard was published on 14 November 2011.

The following are represented on Committee QR-005:

- Asset Management Council
 - Australian Industry Group
 - Australian Organisation for Quality
 - CSIRO Information and Communication Technologies Centre
 - Department of Defence (Australia)
 - Energy Networks Association
 - Engineers Australia
 - Independent Transport Safety & Reliability Regulator
 - Risk Management Association of Australia
 - Risk Management Institution of Australasia
 - The University of New South Wales
 - University of Wollongong
-

This Standard was issued in draft form for comment as DR AS IEC 60300.3.11.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee QR-005, Dependability, to supersede AS IEC 60300.3.11—2004, *Dependability management*, Part 3.11: *Application guide—Reliability centred maintenance*.

The objective of this Standard is to provide guidelines for development of failure management policies for equipment and structures using reliability centred maintenance techniques. It is an application guide and an extension of AS IEC 60300.10, Part 10: *Application guide—Maintainability*, AS IEC 60300.14, Part 14: *Application guide—Maintenance and maintenance support* and AS IEC 60300.12, Part 12: *Application guide—Integrated logistic support*.

This Standard is identical with, and has been reproduced from IEC 60300.3.11, Ed.2.0 (2009), *Dependability management—Part 3-11: Application guide—Reliability centred maintenance*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text ‘this part of IEC 60300’ should read ‘this Australian Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian Standard</i>

Only international references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

1	Scope	7
2	Normative references.....	7
3	Terms, definitions and abbreviations	7
3.1	Definitions	8
3.2	Abbreviations.....	11
4	Overview	11
4.1	General	11
4.2	Objectives	12
4.3	Types of maintenance.....	14
5	RCM initiation and planning	15
5.1	Objectives for conducting an RCM analysis.....	15
5.2	Justification and prioritization.....	16
5.3	Links to design and maintenance support.....	16
5.4	Knowledge and training.....	17
5.5	Operating context	17
5.6	Guidelines and assumptions	18
5.7	Information requirements	19
6	Functional failure analysis.....	20
6.1	Principles and objectives	20
6.2	Requirements for definition of functions	20
6.2.1	Functional partitioning.....	20
6.2.2	Development of function statements.....	20
6.3	Requirements for definition of functional failures	21
6.4	Requirements for definition of failure modes	21
6.5	Requirements for definition of failure effects	22
6.6	Criticality	22
7	Consequence classification and RCM task selection	23
7.1	Principles and objectives	23
7.2	RCM decision process	23
7.3	Consequences of failure	26
7.4	Failure management policy selection.....	26
7.5	Task interval.....	27
7.5.1	Data sources	27
7.5.2	Condition monitoring	28
7.5.3	Scheduled replacement and restoration.....	29
7.5.4	Failure finding.....	30
8	Implementation	30
8.1	Maintenance task details	30
8.2	Management actions.....	30
8.3	Feedback into design and maintenance support.....	30
8.4	Rationalization of tasks.....	33
8.5	Implementation of RCM recommendations	34
8.6	Age exploration	34
8.7	Continuous improvement	34
