Australian Standard™

Dependability management

**Part 3.10: Application guide—
Maintainability**

This Australian Standard was prepared by Committee QR-005, Dependability. It was approved on behalf of the Council of Standards Australia on 12 February 2004 and published on 1 April 2004.

The following are represented on Committee QR-005:

AirServices Australia
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Australian Industry Group
Australian Organisation for Quality
Department of Transport and Regional Services (Commonwealth)
Department of Defence (Australia)
Electricity Supply Association of Australia
Institution of Engineers Australia
Quality Society of Australasia
University of New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 03533.

PREFACE

This Standard was prepared by the Standards Australia Committee QR-005, Dependability. This Standard is identical with, and has been reproduced from, IEC 60300-3-10:2001, *Dependability management*, Part 3-10: *Application guide – Maintainability*.

‘Dependability’ is a collective term for performance characteristics (reliability, availability, maintainability) of simple or complex products and systems. The AS IEC 60300 series of dependability management Standards provide general guidelines for establishing a dependability management system to meet most organizational or project needs, supported by a ‘tool kit’ of non-prescriptive standards on a range of dependability application guidelines and methods.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text ‘this International Standard’ should read ‘this Australian Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian or Australian/New Zealand Standard</i>

CONTENTS

INTRODUCTION	v
Clause	
1 Scope	1
2 Normative references	1
3 Definitions and acronyms	2
3.1 Definitions	2
3.2 Acronyms	4
4 Maintainability overview	4
4.1 General	4
4.2 Product life cycle	4
4.2.1 Concept and definition phase	5
4.2.2 Design and development phase	5
4.2.3 Manufacturing phase	5
4.2.4 Installation phase	6
4.2.5 Operation and maintenance phase	6
4.2.6 Disposal phase	6
5 Maintainability programme	6
5.1 General	6
5.2 Criteria for the development of maintainability programmes	8
5.2.1 User application	8
5.2.2 Product related factors	8
6 Maintainability programme elements and tasks	9
6.1 Planning and constraints	9
6.1.1 Maintenance policy	9
6.1.2 Maintenance concept	10
6.1.3 Specification of maintainability requirements	11
6.2 Maintainability studies	12
6.2.1 Maintainability allocation	12
6.2.2 Maintainability analysis	13
6.2.3 Requirements interpretation	13
6.3 Project management	13
6.3.1 Maintainability management	14
6.3.2 Maintainability programme plans	14
6.3.3 Project decision management	14
6.3.4 Configuration management	15
6.4 Design for maintainability	15
6.4.1 Maintainability design	15
6.4.2 Reliability and maintainability trade off	16
6.4.3 Design for maintenance support	16
6.4.4 Testability	16
6.4.5 Human factors	17
