

AS 2729—1994
ISO 281:1990

Australian Standard®

**Rolling bearings—Dynamic load
ratings and rating life**

This Australian Standard was prepared by Committee ME/37, Rolling Bearings. It was approved on behalf of the Council of Standards Australia on 28 October 1993 and published on 21 March 1994.

The following interests are represented on Committee ME/37:

Australian Chamber of Commerce and Industry
Federation of Automotive Products Manufacturers
Institution of Engineers Australia
Metal Trades Industry Association of Australia
Railways of Australia Committee
Society of Automotive Engineers — Australasia

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
