IEC 60068-2-10:1988

AS 60068.2.10

Australian Standard™

Environmental testing

**Part 2.10: Tests—Test J and guidance:
Mould growth**

This Australian Standard was prepared by Committee EL-026, Protective Enclosures and Environmental Testing for Electrical/Electronic Equipment. It was approved on behalf of the Council of Standards Australia on 14 February 2003 and published on 20 March 2003.

The following are represented on Committee EL-026:

Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Electrical Compliance Testing Authorities
Electrical Regulatory Authorities Council
Electricity Supply Association of Australia
Testing Interests (Australia)

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

AS 60068.2.10—2003

Australian Standard™

Environmental testing

Part 2.10: Tests—Test J and guidance: Mould growth

Originated as part of AS C333—1963.
Previous edition AS 1099.2.10—1989.
AS 1099.2.10—1989 revised and redesignated as AS 60068.2.10—2003.

PREFACE

This Standard was prepared by the Standards Australia Committee EL-026, Protective Enclosures and Environmental Testing for Electrical/Electronic Equipment. It supersedes AS 1099.2.10—1989, *Basic environmental testing procedures for electrotechnology—Tests—Test J—Mould growth*.

The objective of this Standard is to provide the electrotechnology industry with a complete set of environmental test procedures published as a series under AS 60068 *Environmental testing*. This Standard is Part 2.10 of that series.

This Standard is identical with, and has been reproduced, from IEC 60068-2-10:1988, *Environmental testing – Part 2: Tests – Test J and guidance: Mould growth*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this international standard’ should read ‘this Australian Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.
- (d) Any French text on figures should be ignored.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

Any international Standard referenced should be replaced by an equivalent Australian Standard when one is available. The availability of equivalent Australian Standards can be determined either from the Standards Australia catalogue or from the Standards Australia website (www.standards.com.au).

CONTENTS

	<i>Page</i>
1 General	1
2 Health hazards to operators	1
3 Scope	2
4 Reagents and materials	2
4.1 Cultures or spores – Supply and condition	2
4.2 Preparation of mould suspensions	3
4.3 Control strips	4
5 Description of test apparatus	4
5.1 For small specimens	4
5.2 For large specimens	5
6 Severities	5
7 Initial examination	5
8 Preconditioning	5
8.1 For test variants 1 and 2	5
8.2 For test variant 2	5
9 Conditioning	6
9.1 Application	6
9.2 Inoculation	6
9.3 Incubation	6
10 Final examination	7
10.1 Visual examination	7
10.2 Effect of growth	7
10.3 Extent of growth	7
11 Information to be given in the relevant specification	8
Annex A Danger to personnel	9
Annex B Inoculation methods	11
Annex C Recommended safety precautions	12
Annex D Decontamination procedures	14
Annex E Flow-chart	15
Annex F Guidance	16
