

AS 2929—1990

Australian Standard[®]

**Test methods—Guide to the
format, style and content**

This Australian Standard was prepared by Committee CH/23, General Methods of Chemical Analysis. It was approved on behalf of the Council of Standards Australia on 6 October 1989 and published on 2 April 1990.

The following interests are represented on Committee CH/23:

Australian Government Analytical Laboratories
Australian Institute of Food Science and Technology
Confederation of Australian Industry
National Association of Testing Authorities, Australia
National Health and Medical Research Council
Railways of Australia Committee
Royal Australian Chemical Institute
University of Sydney

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 89018.
