IEC 60068-2-18:2000

AS 60068.2.18

Australian Standard™

**Environmental testing**

**Part 2.18: Tests—Test R and guidance:  
Water**

This Australian Standard was prepared by Committee EL-026, Protective Enclosures and Environmental Testing for Electrical/Electronic Equipment. It was approved on behalf of the Council of Standards Australia on 10 May 2003 and published on 16 May 2003.

---

The following are represented on Committee EL-026:

Australian Chamber of Commerce and Industry  
Australian Electrical and Electronic Manufacturer's Association  
Electrical Compliance Testing Association  
Electrical Regulatory Authorities Council  
Electricity Supply Association of Australia  
Testing Interests (Australia)

---

#### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.com.au](mailto:mail@standards.com.au), or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee EL-026, Protective Enclosures and Environmental Testing for Electrical/Electronic Equipment.

The objective of this Standard is to provide the electrotechnology industry with a complete set of environmental test procedures published as a series under AS 60068 *Environmental testing*. This Standard is Part 2.18 of that series.

This Standard is identical with, and has been reproduced from, IEC 60068-2-18:2000, *Environmental testing – Part 2-18: Tests – Test R and guidance: Water*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this international standard’ should read ‘this Australian Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.
- (d) Any French text on figures should be ignored.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

Any international Standard referenced should be replaced by an equivalent Australian Standard when one is available. The availability of equivalent Australian Standards can be determined either from the Standards Australia catalogue or from the Standards Australia website ([www.standards.com.au](http://www.standards.com.au)).

The terms ‘normative’ and ‘informative’ are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

## CONTENTS

	<i>Page</i>
1 Scope and object.....	1
2 Normative references .....	1
3 Definitions .....	1
4 Survey of water tests .....	2
4.1 General .....	2
4.2 Description of Tests R: Water .....	2
5 Test Ra: Falling drops .....	3
5.1 Object .....	3
5.2 Method Ra 1: Artificial rain .....	3
5.2.1 General description of the test .....	3
5.2.2 Severities .....	4
5.2.3 Preconditioning .....	4
5.2.4 Initial measurements .....	4
5.2.5 Testing .....	4
5.2.6 Recovery .....	5
5.2.7 Final measurements .....	5
5.2.8 Information to be given in the relevant specification.....	6
5.3 Method Ra 2: Drip box.....	6
5.3.1 General description of the test .....	6
5.3.2 Severities .....	7
5.3.3 Preconditioning .....	7
5.3.4 Initial measurements .....	7
5.3.5 Testing .....	7
5.3.6 Recovery .....	7
5.3.7 Final measurements .....	7
5.3.8 Information to be given in the relevant specification.....	8
6 Test Rb: Impacting water.....	8
6.1 Object .....	8
6.2 Method Rb 1: Oscillating tube and spray nozzle .....	8
6.2.1 General description of the test .....	8
6.2.2 Method Rb 1.1: Oscillating tube .....	8
6.2.3 Method Rb 1.2: Spray nozzle .....	12
6.3 Method Rb 2: Water jet.....	14
6.3.1 General description of the test .....	14
6.3.2 Severities .....	15
6.3.3 Preconditioning .....	15
6.3.4 Initial measurements .....	15
6.3.5 Testing .....	15
6.3.6 Recovery .....	16
6.3.7 Final measurements .....	16
6.3.8 Information to be given in the relevant specification.....	16
