AS/NZS IEC 60947.6.1:2015

Australian/New Zealand Standard™

Low-voltage switchgear and controlgear

**Part 6.1: Multiple function equipment—
Transfer switching equipment**

AS/NZS IEC 60947.6.1:2015

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-006, Industrial Switchgear and Controlgear. It was approved on behalf of the Council of Standards Australia on 27 May 2015 and on behalf of the Council of Standards New Zealand on 4 August 2015.
This Standard was published on 23 September 2015.

The following are represented on Committee EL-006:

Association of Accredited Certification Bodies
Ausgrid
Australian Chamber of Commerce and Industry
Australian Industry Group
Bureau of Steel Manufacturers of Australia
Business New Zealand
Electrical Contractors Association of New Zealand
Engineers Australia
National Electrical and Communications Association
National Electrical Switchboard Manufacturers Association
Rail Industry Safety and Standards Board (RISSB)

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS IEC 60947.6.1:2015.

AS/NZS IEC 60947.6.1:2015

Australian/New Zealand Standard™

Low-voltage switchgear and controlgear

**Part 6.1: Multiple function equipment—
Transfer switching equipment**

Originated as AS 3639.1—1989.
Jointly revised and designated AS/NZS 3947.6.1:2001.
Jointly revised and redesignated AS/NZS 60497.6.1:2015.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-006, Industrial Switchgear and Controlgear, to supersede AS/NZS 3947.6.1:2001.

The objective of this Standard is to state—

- (a) the characteristics of the equipment;
- (b) the conditions of the equipment with respect to—
 - (i) operation for which the equipment is intended;
 - (ii) operation and behaviour in case of specified abnormal conditions, for example, short-circuit;
 - (iii) dielectric properties;
- (c) the tests intended to confirm that these conditions have been met and the methods for performing these tests; and
- (d) the data to be marked on the equipment and provided by the manufacturer.

This Standard is identical with, and has been reproduced from, IEC 60947-6-1, Ed. 2.1 (2013), *Low-voltage switchgear and controlgear*, Part 6.1: *Multiple function equipment—Transfer switching equipment*. A vertical line in the margin shows where IEC 60947-6-1, Ed. 2.0 (2005), is modified by Amendment 1 (2013). Additions and deletions are displayed in red, with deletions being struck through.

As this Standard is reproduced from an International Standard, the following applies:

- (A) In the source text ‘this part of IEC 60947’ should read ‘this Australian/New Zealand Standard’.
- (B) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

Only normative references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annexes to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.
