PREFACE

This edition of the Handbook which has been restructured and expanded to incorporate new material was prepared in collaboration with a consultant occupational hygienist, Olga Pitt BSc (Hons) Sydney University, CIH (Certified Industrial Hygienist—USA), MAIOH. It makes reference to many Australian and overseas safety Standards concerned with occupational personal protection.

Major changes include new sections dealing with general principles on personal protection in the workplace and guidance for identifying and dealing with hazards encountered in the workplace. Existing material dealing with the prevention of injury to the whole body or various parts of the body such as head, eyes and limbs, and the respiratory system have been expanded to take account of the changes in technology and knowledge about workplace hazards.

Readers' attention is drawn to the point that the Standards from which extracts are taken are subject to amendment and periodic review; therefore at some future time a particular extract may become out of date. The currency of the particular extract may be checked by comparing the date of publication of this Handbook with the date of publication of the Standard or the month and year of publication of any amendment thereto as shown in the current catalogue of Australian Standards.

The views of users of this Handbook will be welcomed by Standards Australia, particularly on the scope of and range of subjects it covers. These comments will be taken into account when the Handbook is next reviewed.

© Copyright — STANDARDS AUSTRALIA

Users of this Handbook are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Handbook to be copied for use exclusively in-house by purchasers of the Handbook without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Handbook and that it is updated whenever the referenced Standards are amended or revised. The number and date of the Handbook should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
