

AS/NZS 4383.1:1996

IEC 1082-1:1991

IEC 1082-1:1991 Amendment 1:1995

(incorporates Corrigendum:1993)

Australian/New Zealand Standard[®]

**Preparation of documents used in
electrotechnology**

Part 1: General requirements

AS/NZS 4383.1:1996

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE/13, Symbols Units and Quantities for Electrotechnology. It was approved on behalf of the Council of Standards Australia on 21 February 1996 and on behalf of the Council of Standards New Zealand on 28 February 1996. It was published on 5 May 1996.

The following interests are represented on Committee TE/13:

AUSTEL

Airservices Australia
Australasian Railway Association
Australian Chamber of Commerce and Industry
Department of Employment and Technical and Further Education, S.A.
Department of Defence, Australia
Institution of Engineers, Australia
Institution of Radio and Electronics Engineers, Australia
Queensland Mining Council
Royal Melbourne Institute of Technology

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE/13 on Symbols, Units and Quantities for Electrotechnology. It is issued as a Joint Standard to supersede various parts of AS 1103, *Diagrams, charts and tables for electrotechnology*.

The objective of this Standard is to provide those who use and develop electrotechnical diagrams with the rules for preparing diagrams for the purpose of uniform and efficient presentation of information.

This Standard is identical with and has been reproduced from IEC 1082-1, *Preparation of documents used in electrotechnology*, Part 1: *General requirements*.

IEC 1082-1:1991 Amendment 1:1995 (which incorporates Corrigendum: 1993) is at the rear of this Standard. Text affected is marked by a marginal bar.

Due to restructuring and extensions of the material in this series of Joint Standards, there is no exact correspondence between the parts of AS/NZS 4383 and those of AS 1103. The following gives an approximate indication:

AS/NZS 4383	Corresponding Parts of AS 1103
Part 1	Parts 1 and 3, portions of Parts 7 and 8
Part 2	Part 4, portions of Parts 7 and 8
Part 3	Parts 5 and 6

The term 'informative' has been used in this Standard to define the application of the annex to which it applies. An 'informative' annex is only for information and guidance.

As this Standard is reproduced from an international Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'this International Standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to international Standards should be replaced by equivalent Australian or Australian/New Zealand Standards as follows:

<i>Reference to International Standards or other Publications</i>	<i>Australian or Australian/New Zealand Standard</i>
