

AS 1189, Part 2—1982

Australian Standard[®]

**DATA PROCESSING—
VOCABULARY**

**Part 2—ARITHMETIC AND
LOGIC OPERATIONS**

This Australian standard was prepared under the direction of Committee MS/20, Computers and Information Processing. It was approved by the Council of the Standards Association of Australia on 18 May 1982 and published on 12 July 1982.

The following interests were represented on the committee responsible for the preparation of this standard:

Australian Banks Payment Systems Committee
Australian Bureau of Statistics
Australian Computer Equipment Suppliers Association
Australian Computer Services Association
Australian Computer Users Association
Australian Public Service Board
CSIRO, Division of Computing Research
Department of Defence
Life Insurance Federation of Australia
Manufacturers of data processing equipment
National Library of Australia
Office Equipment Industry Association of Australia
Public Service Board, N.S.W.
Qantas Airways Limited
Telecom Australia
Universities and Colleges

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This standard was prepared under the authority of the Association's Committee on Computers and Information Processing. It is one part of a series superseding AS 1189—1972, and is identical with and has been reproduced from the corresponding part of International Standard ISO 2382, drawn up by ISO/TC 97, Computers and Information Processing.

The 1972 edition of the standard was based on the American National Standard ANSI X3.12—1970 pending the publication of the ISO vocabulary as ISO 2382. The committee has decided that sufficient parts of the ISO vocabulary have been published to warrant the revision of AS 1189.

The complete standard comprises the following parts:

- Part 0: Consolidated Index
- Part 1: Fundamental Terms
- Part 2: Arithmetic and logic operations
- Part 3: Equipment technology
- Part 4: Organization of data
- Part 5: Representation of data
- Part 6: Preparation and handling of data
- Part 7: Digital computer programming
- Part 8: Control, integrity and security*
- Part 9: Data communication*
- Part 10: Operating techniques and facilities
- Part 11: Control, input-output and arithmetic equipment
- Part 12: Data media, storage and related equipment
- Part 13: Computer graphics and computer micrographics*
- Part 14: Reliability, maintenance and availability
- Part 15: Programming languages*
- Part 16: Information theory
- Part 17: Data base management*
- Part 18: Remote access data and data processing system*
- Part 19: Analog computing*
- Part 20: System development*
- Part 21: Interfaces*
- Part 24: Numerical control of machines*

In addition to the alphabetical index in this part, Part 0 provides a consolidated alphabetical index to the terms defined in Parts 1 to 7, 10 to 12, 14, 16, 19 and 24.

As this standard consists of several parts prepared over a long period there could be some inconsistencies introduced in the later parts when compared with the earlier ones. These inconsistencies will be eliminated as far as possible in later editions. This procedure allows for immediate publication of needed parts and permits an element of flexibility in the preparation of a comprehensive vocabulary in view of the dynamics of language.

* In course of preparation.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

	<i>Page</i>
FOREWORD	4
1 GENERAL	
1.1 Introduction	5
1.2 Scope	5
1.3 Field of Application	5
2 PRINCIPLES AND RULES FOLLOWED	
2.1 Definition of an Entry	5
2.2 Organization of an Entry	5
2.3 Classification of Entries	5
2.4 Selection of Terms and Wording of Definitions	5
2.5 Multiple Meanings	5
2.6 Abbreviations	5
2.7 Use of Parentheses	5
2.8 Use of (Square) Brackets	5
2.9 Use of Terms Printed in Italic Typeface in Definitions and Use of Asterisks	5
2.10 Spelling	5
2.11 Organization of the Alphabetical Index	5
3 TERMS AND DEFINITIONS	
02 Arithmetic and Logic Operations	6
02.01 Methods	6
02.02 Representation of Variables	6
02.03 Numbers	6
02.04 Functions and Mapping	7
02.05 Boolean Operations	8
02.06 Precision, Accuracy and Errors	9
02.07 Arithmetic Operations	10
02.08 Operator Notations in Mathematics	11
02.09 Processing of Numbers and Quantities	11
02.10 Operations—General terms	12
02.11 Shifts	13
02.12 Tables and Diagrams	13
ANNEXES	
A Table of Monadic Boolean Operations	14
B Table of Dyadic Boolean Operations	15
C Additional Terms	16
ALPHABETICAL INDEX	18
