

AS 1046.4—1991

IEC 27-4(1985)

Australian Standard[®]

**Letter symbols for use in
electrotechnology**

**Part 4: Symbols for quantities to
be used for rotating electrical
machines**

[IEC Title: Letter symbols to be used in electrical technology,
Part 4: Symbols for quantities to be used for rotating electrical
machines]

This Australian Standard was prepared by Committee TE/13, Symbols, Units and Quantities for Electrotechnology. It was approved on behalf of the Council of Standards Australia on 9 May 1991 and published on 12 July 1991.

The following interests are represented on Committee TE/13:

The Association of Consulting Engineers, Australia
Board of Works, Melbourne
Civil Aviation Authority
Confederation of Australian Industry
Department of Defence
Department of Technical and Further Education, N.S.W.
Department of Technical and Further Education, S.A.
Electricity Supply Association of Australia
Institute of Draftsmen, Australia
Institution of Radio and Electronics Engineers, Australia
Queensland Chamber of Mines
Railways of Australia Committee
Royal Melbourne Institute of Technology
State Training Board of Victoria

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 90180.

PREFACE

This Standard was prepared by the Standards Australia Committee on Symbols, Units and Quantities for Electrotechnology. It is identical with and has been reproduced, in dual language French and English, from IEC 27-4(1985), *Letter symbols to be used in electrical technology, Part 4: Symbols for quantities to be used for rotating electrical machines.*

This Standard is the fourth part of a series which deals with letter symbols used in the electrical field, viz.:

AS

1046 *Letter symbols for use in electrotechnology*

1046.1 Part 1: *General*

1046.2 Part 2: *Telecommunications and electronics*

1046.3 Part 3: *Logarithmic quantities and units*

1046.4 Part 4: *Symbols for quantities to be used for rotating electrical machines*

Under arrangements made between Standards Australia and the International Standards Bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian Standard are advised of the following:

- (a) Copyright is vested in Standards Australia.
- (b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purposes of this Australian Standard, replace references to International Standards by references to Australian Standards as follows:

<i>Reference to International Standard</i>		<i>Australian Standard</i>	
IEC		AS	
34	Rotating electrical machines	1359	Rotating electrical machines—General requirements
34-1	Part 1: Rating and performance	1359.1	Part 1: Definitions
		1359.41	Part 41: General characteristics
34-4	Part 4: Methods of determining synchronous machine quantities from tests	—	
50	International electrotechnical vocabulary (IEV)	1852	International electrotechnical vocabulary
50(121)	Chapter 121: Electromagnetism	1852(121)	Chapter 121: Electromagnetism
50(411)	Chapter 411: Rotating machines	1852(411)	Chapter 411: Rotating machines
72	Dimensions and output series for rotating electrical machines	1360	Rotating electrical machines of particular types or for particular applications
		1360.11	Part 11: Dimensions and performance of small power electrical machines

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
