

AS 1217.4—1985

Australian Standard[®]

**ACOUSTICS—DETERMINATION
OF SOUND POWER LEVELS OF
NOISE SOURCES**

**Part 4—ENGINEERING METHODS
FOR SPECIAL
REVERBERATION TEST
ROOMS**

This Australian standard was prepared by Committee AK/2, Techniques for Measurement. It was approved on behalf of the Council of the Standards Association of Australia on 30 August 1984 and published on 4 April 1985.

The following interests are represented on Committee AK/2:

Australian Acoustical Society
CSIRO, Division of Building Research
CSIRO, National Measurement Laboratory
Department of Aviation
Department of Industrial Relations, N.S.W.
Department of Housing and Construction
Environment Protection Authority of Victoria
Metal Trades Industry Association of Australia
National Acoustic Laboratories
Telecom Australia
University of Adelaide
University of Queensland

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 83001.
