

AS/NZS 60745.2.5:2003
(IEC 60745-2-5:2003, IDT)

Australian/New Zealand Standard™

HAND-HELD MOTOR-OPERATED
ELECTRIC TOOLS – SAFETY –

Part 2.5: Particular requirements for
circular saws
(IEC 60745-2-5:2003, IDT)

AS/NZS 60745.2.5:2003

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL/2 - Safety of household and similar electrical appliances and small power transformers. It was approved on behalf of the Council of Standards Australia on 1 September 2003 and by the Council of Standards New Zealand on 9 September 2003. It was published on 14 November 2003.

The following interests are represented on Committee EL/2

Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Consumer Electronic Suppliers Association, Australia
Electrical regulatory authorities, Australia
Electrical test laboratories
Electrical consultants
Electricity Supply Association of Australia
Institution of Engineers Australia
Metal Trades Industries Association of Australia
Ministry of Consumer Affairs, New Zealand

Keeping Standards up-to-date

Standards are living documents, which reflect progress in science, technology and systems.

To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue. Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comment to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

CONTENTS

FOREWORD.....	4
1 Scope	6
2 Normative references	6
3 Definitions	6
4 General requirements	7
5 General conditions for the tests	7
6 Void	7
7 Classification.....	7
8 Marking and instructions	7
9 Protection against access to live parts	10
10 Starting	10
11 Input and current	10
12 Heating	10
13 Leakage current	10
14 Moisture resistance	10
15 Electric strength	11
16 Overload protection of transformers and associated circuits	11
17 Endurance.....	11
18 Abnormal operation	11
19 Mechanical hazards.....	11
20 Mechanical strength	15
21 Construction.....	15
22 Internal wiring.....	16
23 Components.....	16
24 Supply connection and external flexible cords	16
25 Terminals for external conductors	16
26 Provision for earthing.....	16
27 Screws and connections	16
28 Creepage distances, clearances and distances through insulation	16
29 Resistance to heat, fire and tracking	16
30 Resistance to rusting	16
31 Radiation, toxicity and similar hazards	16

Annexes	39
Annex K (normative) Battery tools and battery packs	39
Annex L (normative) Battery tools and battery packs provided with mains connection or non-isolated sources	39
Annex AA (normative) Additional requirements for saws with a riving knife	39
Annex BB (normative) Additional requirements for lower guards for saws without a riving knife	43
Annex ZZ (informative) Variations to IEC 60745-2-5:2003 for application in Australia and New Zealand	45
 Bibliography	 44
 Figure 101 – Circular saw with outer pendulum guard	 17
Figure 102 – Circular saw with inner pendulum guard	17
Figure 103 – Circular saw with tow guard	17
Figure 104 – Plunge type saw	17
Figure 105 – Test probe 'a'	18
Figure 106 – Aperture for blade and/or riving knife in the lower guard and aperture of the upper guard	18
Figure 107 – Distance from the gripping surface to the blade's cutting zone	19
Figure 108 – Height restriction of the viewing aperture (see 19.101.2.1).....	33
Figure 110 – Test probe 'b'	34
Figure 112 – Blade exposure angle of the lower guard.....	36
Figure 113 – Principal dimensions of the guide plate	37
Figure 114 – Flange characteristics.....	38
Figure AA.101 – Riving knife stability test.....	42
Figure AA.102 – Riving knife adjustment	42
