

Australian Standard™

**Non-destructive testing—Qualification
and certification of personnel**

This Australian Standard was prepared by Committee MT-007, Non-destructive Testing of Metals and Minerals. It was approved on behalf of the Council of Standards Australia on 2 February 2006.
This Standard was published on 15 March 2006.

The following are represented on Committee MT-007:

Australian Railways Association
Australasian Aerospace Non-destructive Testing Committee
Australian Industry Group
Australian Institute for Non-Destructive Testing
ANSTO
Australian Pipeline Association
Bureau of Steel Manufacturers of Australia
Engineers Australia
Industrial Research Limited
NATA
New Zealand Non-Destructive Testing Association
TestSafe Australia
Victoria WorkCover
Welding Technology Institute of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian StandardsTM and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 05369.

AS 3998—2006

Australian Standard™

Non-destructive testing—Qualification and certification of personnel

Originated as AS 3998—1992.
Previous edition 2002.
Third edition 2006.

PREFACE

This Standard was prepared by the Australian members of Joint Standards Australia/Standards New Zealand Committee MT-007, Non-destructive Testing of Metals and Materials to supersede AS 3998—2002. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

This Standard is identical with and has been reproduced from ISO 9712:2005, *Non-destructive testing—Qualification and certification of personnel*.

The objective of this Standard is to specify a system for the qualification and certification of personnel in general industry who are involved in non-destructive testing.

The objective of this revision is to adopt the current edition of ISO 9712.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this International Standard’ should read ‘this Australian Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

Although this Standard is applicable to aerospace in-service inspection, Standards Australia has issued a separate Australian Standard, AS 3669, *Non-destructive testing—Qualification and registration of personnel—Aerospace*, to cover the aerospace industry. AS 3669 is technically equivalent to EN 4179 and NAS 410.

References to International Standards should be replaced by references to equivalent Australian or Australian/New Zealand Standards, as follows:

Reference to International Standard		Australian Standard	
ISO/IEC		AS ISO/IEC	
17024	Conformity assessment—General requirements for bodies operating certification of persons	17024	Conformity assessment—General requirements for bodies operating certification of persons

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, where an ‘informative’ annex is only for information and guidance.

CONTENTS

Page

1	Scope.....	1
2	Normative references	1
3	Terms and definitions	2
4	Symbols and abbreviated terms.....	5
5	Responsibilities.....	5
6	Levels of qualification	7
7	Eligibility	9
8	Qualification examination — Content and grading	11
9	Qualification examination — Conduct	14
10	Certification	15
11	Files	17
12	Introduction of new NDT methods or sectors.....	18
	Annex A (informative) Sectors	19
	Annex B (normative) Specimen master report.....	20
	Annex C (normative) Level 1 and 2 specimens	21
	Annex D (informative) Weighting of Level 1 and 2 practical examinations.....	22
	Annex E (informative) Weighting of Level 3 NDT procedure examination	23
	Annex F (normative) Structured credit system for Level 3 recertification	24
	Bibliography	25
