AS/NZS 3947.4.3:2000 IEC 60947-4-3:1999

# Australian/New Zealand Standard<sup>™</sup>

## Low-voltage switchgear and controlgear

Part 4.3: Contactors and motor-starters— A.C. semiconductor controllers and contactors for non-motor loads

#### AS/NZS 3947.4.3:2000

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL/6, Industrial Switchgear and Controlgear. It was approved on behalf of the Council of Standards Australia on 28 March 2000 and on behalf of the Council of Standards New Zealand on 20 March 2000. It was published on 30 May 2000.

The following interests are represented on Committee EL/6:

Australasian Railway Association Australian Chamber of Commerce and Industry Australian Electrical and Electronic Manufacturers Association Bureau of Steel Manufacturers of Australia Electrical Contractors Association of New Zealand Electricity Supply Association of Australia Independent Electrical Switchboard Manufacturers Association Institution of Engineers Australia Ministry of Economic Development New Zealand National Electrical and Communications Association Testing Interests (Australia) WorkCover New South Wales

#### Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standard.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 99499.

## Australian/New Zealand Standard<sup>™</sup>

### Low-voltage switchgear and controlgear

## Part 4.3: Contactors and motor-starters— A.C. semiconductor controllers and contactors for non-motor loads

Originated as AS C63—1965. Previous edition AS 1029.2—1982. Jointly revised and redesignated AS/NZS 3947.4.3:2000.

### PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL/6, Industrial Switchgear and Controlgear to supersede AS 1029.2—1982 Low voltage contactors Part 2: Semiconductor (solid state) (up to and including 1000 V a.c. and 1500 V d.c.).

The objective of this Standard is to provide characteristics, constructional and performance requirements and tests to verify performance for a.c. semiconductor non-motor load controllers and contactors for rated voltage up to 1000 V a.c.

This Standard is Part 4.3 of a series which, when complete, will consist of the following:

AS(/NZS) 3947	Low-volta	ge switchgear and controlgear
AS/NZS 3947.1	Part 1:	General rules
AS 3947.2	Part 2:	Circuit-breakers
AS/NZS 3947.3	Part 3:	Switches, disconnectors, switch-disconnectors and fuse- combination units
AS/NZS 3947.3 Supp1	Part 3:	Switches, disconnectors, switch-disconnectors and fuse- combination units Supplement 1: Fuse-switch-disconnectors and switch- disconnectors for use with low voltage aerial bundled cables
AS 3947.4.1	Part 4.1:	Contactors and motor-starters-Electromechanical contactors and motor-starters
AS 3947.4.2	Part 4.2:	Contactors and motor-starters–A.C. semiconductor motor controllers and starters
AS/NZS 3947.4.3	Part 4.3:	Contactors and motor-starters–A.C. semiconductor controllers and contactors for non-motor loads
AS/NZS 3947.5.1	Part 5.1	Control circuit devices and switching elements– Electromechanical control circuit devices
AS/NZS 3947.5.2	Part 5.2:	Control circuit devices and switching elements–Proximity switches
AS/NZS 3947.5.3	Part 5.3	Control circuit devices and switching elements– Requirements for proximity devices with defined behaviour under fault conditions
AS/NZS 3947.5.4	Part 5.4:	Control circuit devices and switching elements–Methods of assessing the performance of low-energy contacts–Special tests
AS/NZS 3947.5.5	Part 5.5	Control circuit devices and switching elements–Electrical emergency stop devices with mechanical latching function
AS/NZS 3947.5.6	Part 5.6	Control circuit devices and switching elements–D.C. interface for proximity sensors and switching amplifiers (NAMUR)
AS 3947.6.1	Part 6.1:	Multiple function equipment-Automatic transfer switching equipment
AS 3947.6.2	Part 6.2:	Multiple function equipment–Control and protective switching devices (or equipment) (CPS)
AS 3947.7.1	Part 7.1:	Ancillary equipment-Terminal blocks for copper conductors
AS 3947.7.2	Part 7.2:	Ancillary equipment–Protective conductor terminal blocks for copper conductors
AS/NZS 3947.7.3	Part 7.3:	Ancillary equipment–Safety requirements for terminal blocks for the reception of cartridge fuse-links

iii

This Standard is identical with and has been reproduced from IEC 60947-4-3:1999, Low-voltage switchgear and controlgear—Part 4-3: Contactors and motor-starters—AC semiconductor controllers and starters for non motor loads.

A reference to an International Standard identified in the Normative References Clause by strikethrough (example) is replaced by a reference to the Australian or Australian/New Zealand Standard(s) listed immediately thereafter and identified by shading (example). Where the struck-through referenced document and the referenced Australian or Australian/New Zealand Standard are identical, this is indicated in parenthesis after the title of the latter.

In January 1997, the IEC commenced numbering its Standards from 60000 by adding 60000 to the number of each existing Standard. This coordinates IEC numbering with ISO numbering. During the transition period an IEC Standard might be identified by its new number or its old number (for example, IEC 60050 or IEC 50).

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'this standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the annex to which they apply. A normative annex is an integral part of a Standard, whereas an informative annex is only for information and guidance.
