Australian/New Zealand Standard™

Effects of current on human beings and livestock

Part 2: Special aspects

[IEC title: Effects of current passing through the human body—Part 2: Special aspects]

AS/NZS 60479.2:2002

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-001, Wiring Rules. It was approved on behalf of the Council of Standards Australia on 10 September 2002 and on behalf of the Council of Standards New Zealand on 3 September 2002. It was published on 3 October 2002.

The following are represented on Committee EL-001:

Association of Consulting Engineers Australia
Australian Building Codes Board
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Communications, Electrical Plumbing Union
Electrical Contractors Association of New Zealand
Electrical Safety Organisation (New Zealand)
Electricity Supply Association of Australia
ElectroComms & Energy Utilities Qualifications Standards Body of Australia
Institute of Electrical Inspectors
Institution of Engineers Australia
Insurance Council of Australia
Ministry of Economic Development (New Zealand)
National Electrical and Communications Association
New Zealand Council of Elders
New Zealand Electrical Institute
Regulatory Authorities (Electrical)
Telstra Corporation

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

Australian/New Zealand Standard™

Effects of current on human beings and livestock

Part 2: Special aspects

Originated as part of MP 30—1976.
Previous edition AS 3859—1991.
Jointly revised and redesignated in part as AS/NZS 60479.2:2002.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-001, Wiring Rules to supersede AS 3859—1991 Chapters 4, 5 and 6.

AS 3859—1991 was produced from IEC 60479, *Effects of current passing through the human body*, 60479-1:1984 *Part 1: General aspects*, and 60479-2:1987 *Part 2: Special aspects*. Subsequently IEC 60479-1 was revised and issued as IEC 60479-1:1994 (third edition). IEC 60479-2 was reconfirmed without change and a new IEC 60479-3:1998 published. AS 3859—1991 has been revised and issued as AS/NZS 60479.1, 60479.2 and 60479.3.

The objective of this Standard is to provide basic guidance on the special aspects of the effects of electric currents on persons for the establishment of electrical safety requirements.

This Standard has been reproduced from IEC 60479-2:1987, *Effects of current passing through the human body—Part 2: Special aspects Chapter 4: Effects of alternating current with frequencies above 100 Hz Chapter 5: Effects of special waveforms of current Chapter 6: Effects of unidirectional single impulse currents of short duration*.

Variations to IEC 60479-2:1987 are indicated at the appropriate places throughout this Standard. Strikethrough (~~example~~) identifies IEC tables, figures and passages of text which, for the purposes of this Australian/New Zealand Standard, are deleted. Where Australian/New Zealand tables, figures or passages of text are added, each is set in its proper place and identified by shading (**example**). Added figures are not themselves shaded, but are identified by a shaded border.

This Standard is Part Two of a series that includes the following:

AS/NZS

- 60479 Effects of current on human beings and livestock
- 60479.1 Part 1: General aspects
- 60479.2 Part 2: Special aspects (this Standard)
- 60479.3 Part 3: Effects of currents passing through the body of livestock

In January 1997, the IEC commenced numbering its Standards from 60000 by adding 60000 to the number of each existing Standard. This coordinates IEC numbering with ISO numbering. During the transition period an IEC Standard might be identified by its new number or its old number (for example, IEC 60050 or IEC 50).

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) A full point should be substituted for a comma when referring to a decimal marker.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

CONTENTS

	<i>Page</i>
INTRODUCTION.....	iv
CHAPTER 4: EFFECTS OF ALTERNATING CURRENT WITH FREQUENCIES ABOVE 100 Hz	
Clause	
1 General	1
2 Scope	1
3 Definitions	1
4 Effects of alternating current in the frequency range above 100 Hz up to and including 1 000 Hz.....	2
5 Effects of alternating current in the frequency range above 1 000 Hz up to and including 10 000 Hz	2
6 Effects of alternating current in the frequency range above 10 000 Hz	2
CHAPTER 5: EFFECTS OF SPECIAL WAVEFORMS OF CURRENT	
1 General	5
2 Scope	5
3 Definitions	5
4 Effects of alternating current with d.c. components	5
5 Effects of alternating current with phase control.....	7
6 Effects of alternating current with multicycle control.....	8
CHAPTER 6: EFFECTS OF UNIDIRECTIONAL SINGLE IMPULSE CURRENT OF SHORT DURATION	
1 General	13
2 Scope	13
3 Definitions	13
4 Effects of unidirectional impulse currents of short duration	14
BIBLIOGRAPHY	21
