

AS/NZS 1102.113:1995
IEC 617-13:1993

Australian/New Zealand Standard

**Graphical symbols for
electrotechnology**

Part 113: Analogue elements

[IEC title: Graphical symbols for diagrams,
Part 13: Analogue elements]

AS/NZS 1102.113:1995

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE/13, Symbols Units and Quantities for Electrotechnology. It was approved on behalf of the Council of Standards Australia on 4 October 1994 and on behalf of the Council of Standards New Zealand on 17 October 1994. It was published on 5 January 1995.

The following interests are represented on Committee TE/13:

Association of Consulting Engineers Australia
Austel
Australian Chamber of Commerce and Industry
Civil Aviation Authority
Department of Defence
Department of Technical and Further Education, S.A.
Institution of Engineers Australia
Institution of Radio and Electronics Engineers Australia
Queensland Mining Council
Railways of Australia
Royal Melbourne Institute of Technology
State Training Board, Vic.

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE/13 on Symbols, Units and Quantities for Electrotechnology. It is issued as a Joint Standard.

The objective of this Standard is to provide users of electrotechnical documents with graphical symbols for analogue elements to obtain consistent presentation and meaning in diagrams.

This Standard is identical with and has been reproduced from IEC 617-13:1993, *Graphical symbols for diagrams*, Part 13: *Analogue elements*.

As this Standard is reproduced from an international Standard, the following applies:

- (a) The international Standard number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text, 'this International Standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

The symbol numbers in this Standard have retained the IEC 617-13 numbers. In AS 1102, *Graphical symbols for electrotechnology*, Part 101: *General information and general index*, the symbol numbers have '113' as the first part of the symbol number instead of '13'. References in this Standard to symbols in which the first part of the symbol number is '01' to '10' should be substituted by '101' to '110' respectively.

References to international Standards should be replaced by equivalent Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian or Australian/New Zealand Standard</i>	
IEC		AS	
27-1	Letter symbols to be used in electrical technology, Part 1: General	1046 1046.1	Letter symbols for use in electrotechnology Part 1: General

CONTENTS

Clauses

	CHAPTER I: GENERAL	Page
1	Scope	1
2	Normative references	1
3	General notes	1
	CHAPTER II: QUALIFYING SYMBOLS ASSOCIATED WITH INPUTS, OUTPUTS AND OTHER CONNECTIONS	
4	Qualifying symbols indicating the type of signal	3
5	Qualifying symbols indicating the functions of inputs, outputs and other connections	4
	CHAPTER III: ELEMENTS PERFORMING MATHEMATICAL FUNCTIONS	
6	General	13
7	Examples of elements performing mathematical functions	14
8	Amplifiers	15
9	Examples of amplifiers	18
	CHAPTER IV: CONVERTERS	
10	General	21
11	Examples of converters	22
	CHAPTER V: REGULATORS, COMPARATORS	
12	Voltage regulators	24
13	Examples of voltage regulators	24
14	Comparators	25
15	Examples of comparators	26
	CHAPTER VI: MISCELLANEOUS	
16	Examples of complex function elements	26
17	Examples of electronic switches	27
18	Other devices	27
	Annexes	
	Alphabetical index	28
	Index of devices for which symbols are shown	31

(PAGE iv IN THE HARD COPY IS BLANK.)
