Australian Standard<sup>™</sup>

# Work in compressed air and hyperbaric facilities

Part 2: Hyperbaric oxygen facilities

This Australian Standard was prepared by Committee SF-046, Non-diving Work in Compressed Air and Hyperbaric Treatment Facilities. It was approved on behalf of the Council of Standards Australia on 29 March 2002 and published on 24 April 2002.

The following interests are represented on Committee SF-046:

Australian and New Zealand Hyperbaric Medicine Group

Australian and New Zealand College of Anaesthetists

Australian Industry Group

Australian Medical Association

Hyperbaric Engineering Industry Forum

Hyperbaric Technicians and Nurses Association

Institution of Engineers Australia

South Pacific Underwater Medicine Society

WorkCover New South Wales

#### Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 00249.

#### PREFACE

This Standard was prepared by Standards Australia Committee SF-046, Non-diving Work in Compressed Air and Hyperbaric Treatment Facilities, in response to a request from the Hyperbaric Technicians and Nurses Association (HTNA).

This Standard was prepared using the Hyperbaric Oxygen Therapy Facilities Industry Guidelines (HOTFIG) as a basis. HOTFIG was prepared by participants in the hyperbaric oxygen therapy industry during the period of 1995 to 1998. HOTFIG was a consensus document prepared by a committee with membership from the HTNA, Australian and New Zealand Hyperbaric Medicine Group and operators and suppliers of hyperbaric chambers.\* A wider review group provided comment on HOTFIG drafts at various stages.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendices. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

<sup>\*</sup> The Undersea and Hyperbaric Medicine Society (UHMS) *Guidelines for Clinical Multiplace Hyperbaric Facilities* was used as a basis for HOTFIG.
