

AS 1028—1992
IEC 289:1988

Australian Standard[®]

**Power reactors and earthing
transformers**

[IEC title: Reactors]

This Australian Standard was prepared by Committee EL/8, Power Transformers. It was approved on behalf of the Council of Standards Australia on 18 October 1991 and published on 17 January 1992.

The following interests are represented on Committee EL/8:

Australian Electrical and Electronic Manufacturers Association
Confederation of Australian Industry
Electrical testing laboratories
Electricity Supply Association of Australia
Electricity Supply Engineers Association of New South Wales
Institute of Technology, S.A.
Institution of Engineers, Australia
Railways of Australia Committee

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 90127.

AS 1028—1992

Australian Standard[®]

**Power reactors and earthing
transformers**

First published as AS 1028—1970.
Second edition 1992.

PREFACE

This Standard was prepared by the Standards Australia Committee on Power Transformers to supersede AS 1028—1970. It is identical with and has been reproduced from IEC 289:1988, *Reactors*. Variations to the IEC Publication required to suit Australian requirements are indicated by marginal bars and detailed in Australian Appendix A. Details concerning particular requirements for earth current-limiting neutral displacement reactors are given in Australian Appendix B.

This Standard should be read in conjunction with AS 2374, *Power transformers*.

Under arrangements made between Standards Australia and the International Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian Standard are advised of the following:

- (a) Copyright is vested in Standards Australia.
- (b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.
- (c) There may be occasional dual language sections, but English is always one of the languages reproduced.
- (d) Where any cross-references to page numbers appear within the text, these relate to page numbering in the International Standard and are to be disregarded.

For the purpose of this Australian Standard, the text should be modified as follows:

- (a) *Clauses* In accordance with Australian Appendix A.
- (b) *References* The references to other International Standards should be replaced by references to Australian Standard as follows:

<i>Reference to International Standard</i>		<i>Australian Standard</i>

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
