AS/NZS 1554.1:2004 (Incorporating Amendment No. 1)

Australian/New Zealand Standard™

Structural steel welding

Part 1: Welding of steel structures

AS/NZS 1554.1:2004

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee WD-003, Welding of Structures. It was approved on behalf of the Council of Standards Australia on 19 December 2003 and on behalf of the Council of Standards New Zealand on 5 March 2004.

This Standard was published on 24 March 2004.

The following are represented on Committee WD-003:

Australian Chamber of Commerce and Industry Australian Industry Group AUSTROADS Bureau of Steel Manufacturers of Australia Electricity Supply Association of Australia Institute of Engineers Australia New Zealand Heavy Engineering Research Association New Zealand Non-destructive Testing Association Steel Reinforcement Institute of Australia University of Sydney Welding Technology Institute of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 02618.

AS/NZS 1554.1:2004 (Incorporating Amendment No. 1)

Australian/New Zealand Standard™

Structural steel welding

Part 1: Welding of steel structures

Originated in Australia as AS CA8—1933. Originated in New Zealand, in part, as NZS 4701:1981. Previous edition AS/NZS 1554.1:2000. Seventh edition 2004. Reissued incorporating Amendment No. 1 (January 2005).

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WD-003, Welding of Structures, to supersede AS/NZS 1554.1—2000.

This Standard incorporates Amendment No. 1 (January 2005). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The objective of this Standard is to provide rules for the welding of a wide range of steel constructions and while it is expected that its main use will be for statically loaded welds, it applies also to some welds subject to fatigue. Although this Standard has been specifically prepared for steel structures, it may be usefully applied to machine frames and other types of steel constructions.

- A1 | This edition incorporates the following major changes to the 2000 edition:
 - (a) Amendments to the following Clauses:

1.6(a)(i), 1.6(a)(ii), 1.6(b)(i), 1.6(b)(ii), 1.6(b)(iii), 1.7 (new NOTE), 1.8.2 (NOTE deleted), 1.8.3 (new Clause), 2.1 (last paragraph and NOTE), 2.3.4, 3.3.1 (first paragraph), 4.1.2 (first sentence), 4.3, 4.4(c), 4.5.5.1 (second paragraph), 4.5.5.3, 4.6.1.1, 4.7.1 (NOTE 1 deleted), 4.7.9 (second paragraph), 4.7.10 (second sentence), 4.11 (new NOTE), 4.12.1, 4.12.2(f)(ii), 4.12.2 (NOTE 2), 5.1.1 (last two sentences), 5.2.2 (second paragraph), 5.3.3, 5.8.1 (new NOTE), 5.8.4 (new NOTE), 7.2, B3.3, B4.2 (first paragraph), Appendix D (new Item (n)).

(b) Amendments to the following Tables:

3.3.5 (Title), 4.7.1, 4.11(A) (Items (b), (c), (e) and (k)), 4.12.2 (NOTE 2), 5.3.4(A), C2, E1 (drawings for joints B-C 8a and B-C 8b), E4 (new joints H-C 1c and H-C 1d).

(c) Amendments to the following Figures:

3.4.1(c), 4.5.5.2 (new), 4.5.5.3 (NOTES), 5.3.4(A).

The Standard requires that weld preparations, welding consumables and welding procedures be qualified before commencement of welding. Prequalified joint preparations, welding consumables and welding procedures are also given in the Standard.

The Standard, in catering for structures subject to fatigue conditions as well as statically loaded structures, provides two categories of welds with two differing levels of weld quality assurance associated with the different types of service to which the welds are subjected. The intention is that the designer select the category suited to the severity of the service and nominate this on the drawings. Where a structure contains both categories, this nomination of appropriate categories will ensure that appropriate levels of supervision and inspection will be applied to the relevant parts of the structure.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.
