

Australian Standard[®]

Cathodic protection of metals

Part 4: Internal surfaces

This Australian Standard® was prepared by Committee MT-014, Corrosion of Metals. It was approved on behalf of the Council of Standards Australia on 29 September 2006. This Standard was published on 23 October 2006.

The following are represented on Committee MT-014:

- AUSTAP
 - Australian Corrosion Association
 - Australasian Institute of Metal Finishing
 - Australian Chamber of Commerce and Industry
 - Australian Electrolysis Committee
 - Australian Paint Manufacturer's Federation
 - Australian Paint Approval Scheme
 - Australian Pipeline Industry Association
 - Blast Cleaning and Coating Association of Australia
 - Bureau of Steel Manufacturers of Australia
 - Division of Building, Construction and Engineering, CSIRO
 - Energy Networks Association
 - Galvanizers Association of Australia
 - United Water International
 - Water Corporation of Western Australia
 - Corrosion consultants
 - Water Services Association of Australia (WSAA)
-

This Standard was issued in draft form for comment as DR 06282.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard has been prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee MT-014, Corrosion of Metals, to supersede AS 2832.4—1994, *Cathodic protection of metals*, Part 4: *Internal surfaces*.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this revision is to revise the current cathodic protection requirements for the protection of internal surfaces.

This Standard is Part 4 of the AS 2832 series of Standards. The other parts are as follows:

AS

2832	Cathodic protection of metals
2832.1	Part 1: Pipes and cables
2832.2	Part 2: Compact buried structures
2832.3	Part 3: Fixed immersed structures
2832.4	Part 4: Internal surfaces (this Standard)
2832.5	Part 5: Steel in concrete structures

The Committee decided that there were no International Standards (ISO) which were suitable to be used as an Australian Standard.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
FOREWORD.....	5
 SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	6
1.2 REFERENCED DOCUMENTS	7
1.3 DEFINITIONS	7
1.4 COMPETENCE OF PERSONNEL	11
 SECTION 2 CRITERIA FOR CATHODIC PROTECTION	
2.1 GENERAL	12
2.2 POTENTIAL CRITERIA FOR FERROUS VESSELS	13
2.3 POTENTIAL CRITERIA FOR MIXED METALLIC STRUCTURES.....	13
2.4 POTENTIAL CRITERIA FOR ALUMINIUM STRUCTURES	13
2.5 POTENTIAL CRITERIA FOR TITANIUM.....	13
2.6 OVERPROTECTION	13
 SECTION 3 MEASUREMENT AND EQUIPMENT	
3.1 GENERAL	14
3.2 POTENTIAL MEASUREMENT AND EQUIPMENT	14
 SECTION 4 DESIGN OF STRUCTURES FOR CATHODIC PROTECTION	
4.1 GENERAL	15
4.2 STRUCTURE COATING	15
4.3 INTERFERENCE WITH FOREIGN STRUCTURES	15
4.4 ISOLATION OF STRUCTURES IN CONTACT WITH THE INTERNAL ELECTROLYTE	16
4.5 ELECTRICAL CONTINUITY	16
4.6 FITTINGS TO SUPPORT ANODES AND MONITORING EQUIPMENT.....	16
4.7 VENTING	16
 SECTION 5 DESIGN OF CATHODIC PROTECTION SYSTEMS	
5.1 GENERAL	17
5.2 SAFETY PRECAUTIONS	17
5.3 DESIGN REQUIREMENTS	17
5.4 DESIGN DATA.....	18
5.5 CABLES.....	18
5.6 SYSTEM DESIGN DOCUMENTATION	20
 SECTION 6 INSTALLATION OF CATHODIC PROTECTION SYSTEMS	
6.1 GENERAL	21
6.2 MATERIALS AND EQUIPMENT ACCEPTANCE TESTS.....	21
6.3 INSTALLATION OF GALVANIC ANODE SYSTEMS	22
6.4 INSTALLATION OF IMPRESSED CURRENT SYSTEMS.....	22
6.5 REFERENCE ELECTRODES.....	23
6.6 SYSTEM DESIGN DOCUMENTATION	23
 SECTION 7 COMMISSIONING OF CATHODIC PROTECTION SYSTEMS	
7.1 SCOPE AND GENERAL	25
7.2 PRE-ENERGIZATION TESTING	25
