AS/NZS ISO/IEC 15026.4:2013

Australian/New Zealand Standard™

**Systems and software engineering—  
Systems and software assurance**

**Part 4: Assurance in the life cycle**

### **AS/NZS ISO/IEC 15026.4:2013**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-015, Software and Systems Engineering. It was approved on behalf of the Council of Standards Australia on 2 May 2013 and on behalf of the Council of Standards New Zealand on 29 April 2013.

This Standard was published on 24 May 2013.

---

The following are represented on Committee IT-015:

Australian Computer Society  
Australian Society for Technical Communication, NSW  
Charles Sturt University  
Department of Defence, Australia  
Griffith University  
Quantitative Enterprise Software Performance  
La Trobe University  
National Association of Testing Authorities Australia  
National ICT Australia  
New Zealand Organisation for Quality  
NSW Business Chamber  
Systems Engineering Society of Australia  
University of Auckland  
University of Technology, Sydney  
Vendor Interests, New Zealand

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR AS/NZS ISO/IEC 15026.4.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-015, Software and Systems Engineering.

The objective of this Standard is to provide guidance and recommendations for conducting selected processes, activities and tasks for systems and software products requiring assurance claims for properties selected for special attention, and called ‘critical properties’. It also specifies a property-independent list of processes, activities and tasks, in the context of a defined life cycle model, to achieve the claim and show the achievement of the claim.

This Standard is identical with, and has been reproduced from ISO/IEC 15026-4:2012, *Systems and software engineering—Systems and software assurance—Part 4: Assurance in the life cycle*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this part of ISO/IEC 15504’ should read ‘this Australian/New Zealand Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian/New Zealand Standard</i>

## CONTENTS

1	Scope .....	1
2	Conformance .....	1
3	Normative references.....	1
4	Terms and definitions .....	2
5	Key concepts for and use of this part of ISO/IEC 15026 .....	2
5.1	Life cycle approach.....	2
5.2	Assurance claims.....	2
5.3	Using this part of ISO/IEC 15026.....	3
5.3.1	Use for an agreement.....	3
5.3.2	Use for regulation.....	3
5.3.3	Use for development.....	3
6	Process view purposes and required outcomes .....	3
6.1	Systems assurance process view .....	3
6.1.1	Purpose .....	4
6.1.2	Required outcomes.....	4
6.2	Software assurance process view.....	4
6.2.1	Purpose .....	4
6.2.2	Required outcomes.....	4
7	Assurance guidance and recommendations for selected processes .....	4
7.1	Introduction.....	4
7.2	Acquisition process .....	5
7.2.1	Relevant activities and tasks .....	5
7.2.2	Assurance guidance and recommendations.....	5
7.3	Supply process.....	6
7.3.1	Relevant activities and tasks .....	6
7.3.2	Assurance guidance and recommendations.....	6
7.4	Project planning process .....	7
7.4.1	Relevant activities and tasks .....	7
7.4.2	Assurance guidance and recommendations.....	7
7.5	Decision Management process.....	8
7.5.1	Relevant activities and tasks .....	9
7.5.2	Assurance guidance and recommendations.....	9
7.6	Risk Management process .....	9
7.6.1	Relevant activities and tasks .....	10
7.6.2	Assurance guidance and recommendations.....	11
7.7	Configuration management process.....	11
7.7.1	Relevant activities and tasks .....	11
7.7.2	Assurance guidance and recommendations.....	12
7.8	Information Management process.....	13
7.8.1	Relevant activities and tasks .....	13
7.8.2	Assurance guidance and recommendations.....	13
7.9	Stakeholder Requirements Definition process .....	14
7.9.1	Relevant activities and tasks .....	15
7.9.2	Assurance guidance and recommendations.....	15
7.10	Requirements Analysis process.....	17
7.10.1	Relevant activities and tasks .....	18
7.10.2	Assurance guidance and recommendations.....	19
