

AS/NZS 4396:1999

Australian/New Zealand Standard™

**Connectors—Insulation piercing—
For 0.6/1 kV aerial bundled cables**

AS/NZS 4396:1999

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL/10, Overhead Lines. It was approved on behalf of the Council of Standards Australia on 23 November 1998 on behalf of the Council of Standards New Zealand on 30 October 1998. It was published on 5 February 1999.

The following interests are represented on Committee EL/10:

Australasian Railway Association
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Electricity Engineers Association of New Zealand
Electricity Supply Association of Australia

Review of Standards. To keep abreast of progress in industry, Joint Australian/ New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL/10, Overhead Lines, in response to requests from electricity supply authorities. It is based on a draft prepared by the Electricity Supply Association of Australia.

The objective of this Standard is to provide users and manufacturers of insulation piercing connectors with definitions, functional requirements and test methods to simplify their specification.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A normative appendix is an integral part of a Standard, whereas an informative appendix is only for information and guidance.

In January 1997, IEC commenced numbering its publications from 60000 by adding 60000 to the numbers of each publication. This co-ordinates IEC numbering with ISO numbering. During the transition period an IEC document might be identified by its new number or its old number (e.g. IEC 60050 or IEC 50).

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

© Copyright – STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 REFERENCED DOCUMENTS	5
1.3 DEFINITIONS	5
SECTION 2 FUNCTIONAL REQUIREMENTS	
2.1 METHOD OF MAKING CONNECTION.....	7
2.2 ACCESS TO LIVE PARTS	7
2.3 REMOVABILITY.....	7
2.4 CABLE TYPES.....	7
2.5 CABLE TENSION.....	7
2.6 CABLE ENTRY.....	7
2.7 ORIENTATION.....	7
2.8 ALIGNMENT	7
2.9 CONTACT PLATE.....	7
2.10 SEALING OF CORE ENDS	8
2.11 WATERPROOFING COMPOUND.....	8
2.12 IPC PROFILE	8
2.13 ELECTRICAL SERVICE CONDITIONS.....	8
2.14 RESISTANCE TO WEATHERING.....	8
2.15 FASTENERS	8
SECTION 3 PERFORMANCE REQUIREMENTS	
3.1 GENERAL	10
3.2 ELECTRICAL HEAT CYCLING.....	10
3.3 WATER PENETRATION.....	10
3.4 MECHANICAL DAMAGE TO CONDUCTORS	11
3.5 BRANCH CORE MECHANICAL PULL-OUT	11
3.6 LOW TEMPERATURE ASSEMBLY.....	11
3.7 RESISTANCE TO WEATHERING.....	11
3.8 RESISTANCE TO OVERTORQUE	11
3.9 ATTACHMENT OF SHEARHEADS	11
SECTION 4 TEST REQUIREMENTS	
4.1 TEST COMPONENTS.....	12
4.2 TEMPERATURE.....	12
4.3 FASTENER TIGHTENING TORQUE	12
4.4 TEST ASSEMBLIES	12
4.5 SCHEDULE OF TESTS	12
SECTION 5 MARKING	
5.1 MARKING OF IPCs	14
5.2 MARKING OF PACKAGING.....	14
