VOCABULARY**

**Chapter 602—GENERATION,
TRANSMISSION
AND
DISTRIBUTION OF
ELECTRICITY—
GENERATION**

This Australian Standard was prepared by Committee TE/13, Symbols, Units & Quantities for Electrotechnology. It was approved on behalf of the Council of the Standards Association of Australia on 15 March 1988 and published on 17 June 1988.

The following interests are represented on Committee TE/13:

Australian Electrical and Electronic Manufacturers Association
Confederation of Australian Industry
Department of Administrative Services—Construction Group (Commonwealth)
Department of Defence
Department of Technical and Further Education, N.S.W., Victoria and South Australia
Department of Transport and Communications (Commonwealth)
Electricity Supply Association of Australia
Institute of Draftsmen, Australia
Institution of Radio and Electronics Engineers, Australia
Melbourne & Metropolitan Board of Works
Queensland Chamber of Mines
Railways of Australia Committee
Royal Melbourne Institute of Technology
Telecom Australia
The Association of Consulting Engineers, Australia
The technical press

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Association's Committee on Symbols, Units and Quantities for Electrotechnology, under the authority of both the Telecommunications and Electronics Standards Board and the Electrical Standards Board. This Standard together with AS 1852 (Chapters 601 and 603 to 605) supersedes AS 1852(25)—1970, *International Electrotechnical Vocabulary, Generation, transmission and distribution of electrical energy*, which was withdrawn in July 1985.

This Standard is identical with and has been reproduced from IEC 50(602)—1983. Acknowledgment is accordingly made to the International Electrotechnical Commission for this assistance.

This Standard is the second chapter of a series of five chapters covering the generation, transmission and distribution of electricity. The division of chapters is as follows:

Chapter 601—General
Chapter 602—Generation
Chapter 603—Power system planning and management
Chapter 604—Operation
Chapter 605—Substations

This Standard is one of the AS 1852 series of Standards. In the past, this series has consisted of direct endorsements of the IEC 50 series of the International Electrotechnical Vocabulary. In future, newly issued parts of IEC 50, where appropriate, will be issued as Australian Standards, i.e. not endorsements. The full text of the definitions in English, French and Russian has been included as some definitions are considered to be incomplete when produced in one language.

The purpose of the AS 1852 series is to provide a glossary of terms used in electrical engineering. The series lists terms in English, French and Russian, and in some cases Spanish. It is intended that other Australian Standards will refer to AS 1852 and not repeat any definitions.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

INTERNATIONAL ELECTROTECHNICAL VOCABULARY

CHAPTER 602—GENERATION, TRANSMISSION AND DISTRIBUTION OF
ELECTRICITY—GENERATION

SECTION 602-01—POWER STATIONS

602-01-01

centrale électrique

Équipement destiné à la production d'énergie électrique et qui comprend les ouvrages de génie civil, de conversion énergétique ainsi que l'appareillage associé.

power station

An installation whose purpose is to generate electricity and which includes civil engineering works, energy conversion equipment and all the necessary ancillary equipment.

электрическая станция

Установка для генерирования и преобразования электрической энергии, включающая необходимое основное и вспомогательное оборудование.

602-01-02

parc de production

Ensemble des moyens de production d'un réseau.

generation system

The total means of generation in a system.

электрогенерирующая система

Совокупность генерирующего электрическую энергию оборудования энергетической системы.

Note. — On peut ne considérer qu'un sous-ensemble défini d'un parc de production (exemple: parc thermique).

Note. — One can also consider only one given subgroup (thermal generation system for example).

Примечание. — Можно понимать также оборудование определенной группы электростанций (например, генерирующая система тепловых электростанций).

602-01-03

aménagement hydro-électrique

Complexe ordonné d'ouvrages de génie civil, de machines et d'appareillages divers destiné principalement à transformer l'énergie potentielle de gravité de l'eau en énergie électrique.

hydroelectric installation

An ordered arrangement of civil engineering structures, machinery and plant designed chiefly to convert the gravitational potential energy of water into electricity.

гидроузел энергетического назначения

Комплекс сооружений, машин и другого оборудования, предназначенный главным образом для преобразования потенциальной энергии воды в электрическую энергию.
