### **Structural design actions—Wind actions—Commentary (Supplement to AS/NZS 1170.2:2002)**

### **AS/NZS 1170.2 Supp 1:2002**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee BD-006, General Design Requirements and Loading on Structures. It was approved on behalf of the Council of Standards Australia on 29 March 2002 and on behalf of the Council of Standards New Zealand on 28 March 2002. It was published on 4 June 2002.

The following are represented on Committee BD-006:

Association of Consulting Engineers Australia  
Australian Building Codes Board  
Australian Institute of Steel Construction  
Building Research Association of New Zealand  
Cement and Concrete Association of Australia  
CSIRO Building, Construction and Engineering  
Cyclone Testing Station—James Cook University  
Electricity Supply Association of Australia  
Housing Industry Association  
Institution of Engineers Australia  
Institution of Professional Engineers New Zealand  
Master Builders Australia  
New Zealand Heavy Engineering Research Association  
Steel Reinforcement Institute of Australia  
University of Canterbury New Zealand  
University of Melbourne  
University of Newcastle

Additional interests participating in the preparation of this Standard:

Bureau of Meteorology  
Curtin University of Technology  
Monash University  
National Institute of Water and Atmospheric Research, NZ  
University of Queensland

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

## PREFACE

This Commentary was prepared by the Joint Standards Australia/Standards New Zealand Committee BD-006, General Design Requirements and Loading on Structures, as a Supplement to AS/NZS 1170.2, *Structural design actions*, Part 2: *Wind actions*. This Commentary supersedes, in part, AS 1170.2—1989, *Minimum design loads on structures*, Part 2: *Wind loads* and, in part, NZS 4203:1992, *Code of practice for general structural design and design loadings for buildings (Vol. 2)*.

The Commentary provides background material and guidance to the requirements of the Standard.

The clause numbers of this Commentary are prefixed by the letter ‘C’ to distinguish them from references to the Standard clauses to which they directly relate. Where a Commentary to a certain Clause is non-existent, it is because no explanation of the Clause is necessary.

Appendix CA includes a list of additional definitions used in this Commentary, and Appendix CB includes a list of additional symbols used in this Commentary.

Notwithstanding the general copyright provisions applicable to all Australian Standards as detailed in the Standard, the Standard contains intellectual material provided by other parties and permission to reproduce that material may be conditional on an appropriate royalty payment to Standards Australia, or the other party, or both.

## ACKNOWLEDGEMENT

Standards Australia wishes to acknowledge and thank the following members who have contributed significantly to this Commentary:
