

AS/NZS 4763:2011

Reconfirmed 2024

AS/NZS 4763:2011

Australian/New Zealand Standard™

## Safety of portable inverters

### **AS/NZS 4763:2011**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-002, Safety of Household and Similar Electrical Appliances and Small Power Transformers. It was approved on behalf of the Council of Standards Australia on 4 April 2011 and on behalf of the Council of Standards New Zealand on 21 April 2011.

This Standard was published on 29 April 2011.

---

The following are represented on Committee EL-002:

Association of Certification Bodies  
Australian Industry Group  
Australian Retailers Association  
Business New Zealand  
Consumer Electronic Suppliers Association, Australia  
Consumers' Federation of Australia  
Electrical regulatory authorities, Australia  
Electrical Compliance Testing Association  
Electrical consultants  
Engineers Australia  
Ministry of Economic Development, New Zealand  
New Zealand Electric Fence Energizer Manufacturers' Standards Group

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

**Safety of portable inverters**

---

**RECONFIRMATION NOTICE**

Technical Committee EL-002 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 15 February 2024.

Approved for reconfirmation in New Zealand on behalf of the New Zealand Standards Approval Board on 10 August 2023.

The following are represented on Technical Committee EL-002:

Association of Accredited Certification Bodies  
Australian Industry Group  
Australian Retailers Association  
Better Regulation Division (Fair Trading, SafeWork NSW, TestSafe)  
Business New Zealand  
Consumer Electronics Suppliers Association  
Consumers Federation of Australia  
Electrical Regulatory Authorities Council, Australia  
Engineers Australia  
Joint Accreditation System of Australia & New Zealand  
National Retail Association Australia  
New Zealand Electric Fence Energiser Manufacturers Standards Group  
UL (Testing Interests New Zealand)  
WorkSafe New Zealand

## CONTENTS

FOREWORD.....	4
1 Scope .....	5
2 Normative references .....	5
3 Definitions .....	11
4 General requirements .....	16
5 General notes on tests.....	16
6 Classification.....	17
7 Marking and other information.....	17
8 Protection against accessibility to hazardous live parts.....	20
9 Output voltage and output current .....	21
10 Heating .....	21
11 Short circuit and overload protection .....	24
12 Mechanical strength .....	29
13 Protection against harmful ingress of dust, solid objects and moisture .....	29
14 Insulation resistance and dielectric strength .....	31
15 Construction.....	32
16 Components .....	36
17 Internal wiring.....	40
18 Supply connections and other external flexible cords.....	40
19 Terminals for external conductors .....	45
20 Screws and connections .....	46
21 Creepage distances, clearances and distances through insulation .....	48
22 Resistance to heat and fire .....	54
23 Resistance to rusting .....	56
Annex A (normative) Measuring network for Clause 8.2 .....	62
Annex B (normative) Requirements for switches complying with IEC 61058.....	63
Annex C (normative) Measurement of creepage distances and clearances.....	65
Annex D (normative) Needle flame test .....	71
Annex E (normative) Coated printed circuit board .....	72
Annex F (informative) Verification of inverter separation and RCD operation .....	73
Figure 1 – Diagrams for different types of inverter .....	57
Figure 2 – Standard test finger (see IEC 61032 test probe B).....	58
Figure 3 – Test pin (IEC 61032 test probe 13) .....	59
Figure 4 – Example of an electronic circuit with low-power points (see 11.8) .....	59
Figure 5 – Abrasion resistance test for insulating coated layers .....	60
Figure 6 – Flexing test apparatus .....	61
Figure A.1 – Measuring network for Clause 8.2.....	62
