

Australian/New Zealand Standard™

Explosive atmospheres

Part 30.2: Electrical resistance trace heating—Application guide for design, installation and maintenance

AS/NZS 60079.30.2:2016

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-014, Equipment for Explosive Atmospheres. It was approved on behalf of the Council of Standards Australia on 29 April 2016 and by the New Zealand Standards Approval Board on 20 April 2016. This Standard was published on 18 May 2016.

The following are represented on Committee EL-014:

Auckland Regional Chamber of Commerce
Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Institute of Petroleum
Australian Petroleum Production and Exploration Association
Australian Pipelines and Gas Association
Aviation and Marine Engineers Association
Bureau of Steel Manufacturers of Australia
Department of Industry, Skills and Regional Development, NSW
Department of Natural Resources and Mines (SIMTARS), Qld
Electrical Compliance Testing Association
Electrical Contractors Association of New Zealand
Electrical Regulatory Authorities Council
Engineers Australia
Institute of Electrical Inspectors
Institute of Instrumentation, Control and Automation Australia
Institution of Professional Engineers New Zealand
Mining Electrical and Mining Mechanical Engineering Society
SafeWork NSW
University of Newcastle
Worksafe New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee, EL-014, Equipment for Explosive Atmospheres, to supersede AS/NZS 60079.30.2:2007 *Explosive atmospheres, Part 30.2: Electrical resistance trace heating—Application guide for design, installation and maintenance (IEC 60079-30-2, Ed. 1.0 (2007) MOD)*.

The objective of this Standard is to provide guidance for the application of electrical resistance trace heating systems in areas where explosive gas atmospheres may be present, with the exception of those classified as requiring EPL Ga/Da (traditional relationship to Zone 0 and Zone 20 respectively).

The objective of this revision is to adopt the current edition of IEC/IEEE 60079-30-2.

This Standard is identical with, and has been reproduced from, IEC/IEEE 60079-30-2, Ed. 1.0 (2015), *Explosive atmospheres, Part 30-2: Electrical resistance trace heating—Application guide for design, installation and maintenance*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this part of IEC 60079’ should read ‘this Australian/New Zealand standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>	
IEC		AS/NZS	
60079	Explosive atmospheres	60079	Explosive atmospheres
60079-0	Part 0: Equipment—General requirements	60079.0	Part 0: Equipment—General requirements
60079-15	Part 15: Equipment protection by type of protection “n”	60079.15	Part 15: Equipment protection by type of protection ‘n’
IEC/IEEE			
60079	Explosive atmospheres	60079	Explosive atmospheres
60079-30-1	Part 30-1: Electrical resistance trace heating—General and testing requirements	60079.30.1	Part 30.1: Electrical resistance trace heating—General and testing requirements

Only normative references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

1	Scope	10
2	Normative references	10
3	Terms and definitions	10
4	Application considerations	10
4.1	General.....	10
4.2	Corrosive areas	11
4.3	Process temperature accuracy.....	11
4.3.1	Type I.....	11
4.3.2	Type II	11
4.3.3	Type III.....	11
4.4	Installation considerations.....	11
5	Thermal insulation	12
5.1	General.....	12
5.2	Selection of insulating material	12
5.3	Selection of weather barrier (cladding).....	13
5.4	Selection of economical thickness to provide optimum trace heating design.....	13
5.5	Double insulation	14
6	System design	17
6.1	General.....	17
6.2	Purpose of, and major requirement for, trace heating.....	17
6.3	Training	18
6.4	Selection of trace heater	18
6.4.1	General	18
6.4.2	Site-fabricated trace heaters.....	18
6.4.3	Specific types of trace heating	19
6.5	Maximum temperature determination	19
6.5.1	General	19
6.5.2	PTC characteristic	19
6.5.3	Stabilized design	20
6.5.4	Controlled design.....	20
6.6	Heat up and cool down considerations	20
6.7	Design information.....	20
6.7.1	Design information documentation	20
6.7.2	Isometric or trace heater configuration line lists and load charts	21
6.8	Power system	22
6.9	Earthing requirements.....	22
6.10	Earth-fault protection of equipment	23
6.11	Start-up at minimum ambient temperatures	23
6.12	Long trace heater runs	23
6.13	Flow pattern analysis	23
6.14	Dead-leg control technique	25
6.15	Chimney effect.....	25
6.16	Safety shower and eyewash station design requirements.....	26
