

AS/NZS 3350.1:2002
(Incorporating Amendment Nos 1, 2, 3 and 4)

AS/NZS 3350.1:2002

Australian/New Zealand Standard™

**Safety of household and similar
electrical appliances**

**Part 1: General requirements
(IEC 60335-1:1991, MOD)**

AS/NZS 3350.1:2002

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-002, Safety of Household and Similar Electrical Appliances and Small Power Transformers. It was approved on behalf of the Council of Standards Australia on 7 May 2002 and on behalf of the Council of Standards New Zealand on 21 March 2002.

This Standard was published on 13 May 2002.

The following are represented on Committee EL-002:

Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Consumer Electronic Suppliers Association, Australia
Electrical regulatory authorities, Australia
Electrical test laboratories
Electrical consultants
Electricity Supply Association of Australia
Institution of Engineers Australia
Metal Trades Industries Association of Australia
Ministry of Consumer Affairs, New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

AS/NZS 3350.1:2002
(Incorporating Amendment Nos 1, 2, 3 and 4)

Australian/New Zealand Standard™

**Safety of household and similar
electrical appliances**

**Part 1: General requirements
(IEC 60335-1:1991, MOD)**

Originated as AS/NZS 3350.1:1994.
Second edition 2000.
Third edition 2002.
Reissued incorporating Amendment No. 1 (November 2003).
Reissued incorporating Amendment No. 2 (May 2004).
Reissued incorporating Amendment No. 3 (January 2005).
Reissued incorporating Amendment No. 4 (November 2007).

PREFACE	5
INTRODUCTION.....	7
1 Scope	8
2 Definitions.....	8
3 General requirement.....	13
4 General conditions for the tests	14
5 Void	17
6 Classification.....	17
7 Marking and instructions	17
8 Protection against access to live parts	23
9 Starting of motor-operated appliances.....	25
10 Power input and current.....	25
11 Heating	27
12 Void	32
13 Leakage current and electric strength at operating temperature	32
14 Void	34
15 Moisture resistance	34
16 Leakage current and electric strength	36
17 Overload protection of transformers and associated circuits	39
18 Endurance.....	39
19 Abnormal operation	39
20 Stability and mechanical hazards.....	46
21 Mechanical strength	47
22 Construction.....	47
23 Internal wiring.....	57
24 Components	59
25 Supply connection and external flexible cords	61
26 Terminals for external conductors	69
27 Provision for earthing.....	72
28 Screws and connections	74
29 Creepage distances, clearances and distances through insulation	76
30 Resistance to heat, fire and tracking	81
31 Resistance to rusting	85
32 Radiation, toxicity and similar hazards	85

Annex A (normative) Normative references.....	96
Annex B (normative) Appliances powered by rechargeable batteries.....	100
Annex C (normative) Ageing test on motors.....	103
Annex D VOID.....	105
Annex E (normative) Measurement of creepage distances and clearances.....	106
Annex F (normative) Motors not isolated from the supply mains and having basic insulation not designed for the rated voltage of the appliance.....	111
Annex G (normative) Circuit for measuring leakage currents.....	113
Annex H (informative) Selection and sequence of the tests of clause 30.....	114
Annex J VOID.....	117
Annex K (normative) Glow-wire test.....	118
Annex L VOID.....	119
Annex M (normative) Needle-flame test.....	121
Annex N (normative) Proof tracking test.....	122
Annex P (normative) Severity of duty conditions of insulating material with respect to the risk of tracking.....	123
Annex Q (normative) Capacitors.....	124
Annex R (normative) Safety isolating transformers.....	126
Annex S (normative) Switches.....	127
Annex ZZ (informative) Variations to IEC 60335-1:1991 for application in Australia and New Zealand.....	128
Figure 1 – Test finger.....	86
Figure 2 – Test pin.....	87
Figure 3 – Test probe.....	87
Figure 4 – Diagram for leakage current measurement at operating temperature for single-phase connection of class II appliances.....	88
Figure 5 – Diagram for leakage current measurement at operating temperature for single-phase connection of appliances other than those of class II.....	88
Figure 6 – Diagram for leakage current measurement at operating temperature for three-phase connection of class II appliances.....	89
Figure 7 – Diagram for leakage current measurement at operating temperature for three-phase connection of appliances other than those of class II.....	89
Figure 8 – Diagram for electric strength test at operating temperature.....	90
Figure 9 – Example of an electronic circuit with low-power points.....	90
Figure 10 – Test finger nail.....	92
Figure 11 – Flexing test apparatus.....	93
Figure 12 – Ball-pressure test apparatus.....	93
Figure 13 – Schematic representation of cord anchorages.....	94
Figure 14 – Examples of parts of earthing terminals.....	95
Figure F.1 - Simulation of defects.....	112
Table 1 – Power input deviation.....	25
Table 2 – Current deviation.....	26
