Australian/New Zealand Standard™

---

Fire hazard testing –

Part 11.4: Test flames –  
50 W flame – Apparatus and  
confirmational test method

## AS/NZS 60695.11.4:2004

---

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-002 - Safety of Household and Similar Electrical Appliances and Small Power Transformers. It was approved on behalf of the Council of Standards Australia on 20 August 2004 and by the Council of Standards New Zealand on 03 September 2004. It was published on 15 October 2004.

---

The following interests are represented on Committee EL-002

Australian Industry Group  
Australian Retailers Association  
Australian Electrical and Electronic Manufacturers Association  
Business New Zealand  
Consumer Electronic Suppliers Association, Australia  
Consumers' Federation of Australia  
Electrical regulatory authorities, Australia  
Electrical Compliance Testing Association  
Electrical consultants  
Electricity Supply Association of Australia  
Ministry of Consumer Affairs, New Zealand

---

### **Keeping Standards up-to-date**

Standards are living documents, which reflect progress in science, technology and systems.

To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at [www.standards.org.au](http://www.standards.org.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue. Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comment to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

---

*This standard was issued in draft form for comment as DR 04909*

## CONTENTS

PREFACE .....	4
INTRODUCTION.....	5
1 Scope .....	6
2 Normative references .....	6
3 Terms and definitions .....	6
4 Method A – Production of a standardized nominal 50 W flame test .....	7
4.1 Requirements .....	7
4.2 Apparatus and fuel .....	7
4.2.1 Burner .....	7
4.2.2 Flowmeter.....	7
4.2.3 Manometer .....	7
4.2.4 Control valve .....	7
4.2.5 Copper block .....	8
4.2.6 Thermocouple.....	8
4.2.7 Temperature/time indicating/recording devices .....	8
4.2.8 Fuel gas .....	8
4.2.9 Laboratory fumehood/chamber .....	8
4.3 Production of test flame .....	9
4.4 Confirmation of the test flame .....	9
4.4.1 Principle .....	9
4.4.2 Procedure.....	9
4.4.3 Verification .....	9
5 Method B .....	9
6 Method C .....	10
7 Classification and designation.....	10
Annex A (normative) Test arrangements – Method A .....	13
Annex B (withdrawn).....	17
Annex C (withdrawn).....	18
Annex D (informative) Recommended arrangements for the use of the test flame .....	19
Annex E (informative) Clearance gauge.....	20
Annex F (informative) Test arrangements for tests on equipment .....	21
Annex G (informative) Test arrangements for tests on bar test specimens.....	22
Annex H (informative) Access to equipment manufacturers and suppliers.....	23
Bibliography .....	24

Figure 1 – Copper block.....	11
Figure 2 – Flame height gauge.....	12
Figure A.1 – Burner method A – General assembly.....	13
Figure A.2 – Burner details .....	14
Figure A.3 – Supply arrangement for burner (example).....	15
Figure A.4 – Confirmatory test arrangement .....	16
Figure E.1 – Clearance gauge.....	20
Figure F.1 – Examples of test arrangements.....	21
Figure G.1 – Examples of test arrangements .....	22
