Australian/New Zealand Standard™

Information processing systems— Local area networks

Part 2: Logical link control

[ISO/IEC title: Information technology—Telecommunications and information exchange between systems—Local and metropolitan area networks— Specific requirements, Part 2: Logical link control]

AS/NZS 4802.2:1999

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT/1, Information Systems—Interconnection. It was approved on behalf of the Council of Standards Australia on 14 July 1999 and on behalf of the Council of Standards New Zealand on 28 June 1999. It was published on 5 August 1999.

The following interests are represented on Committee IT/1:

Australian Association of Chief Information Officers
Australian Association of Permanent Building Societies
Australian Bankers Association
Australian Bureau of Statistics
Australian Chamber of Commerce and Industry
Australian Communications Industry Forum
Australian Computer Society
Australian Information Industry Association
Australian Telecommunications Users Group
Australian Vice-Chancellors Committee
CSIRO Mathematical and Information Sciences
Department of Communications and the Arts
Department of Industry Science and Tourism (Commonwealth)
Electrical Compliance Testing Association
Telecom New Zealand
Telstra Corporation

Review of Standards. To keep abreast of progress in industry, Joint Australian/ New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 99169.

AS/NZS 4802.2:1999

Australian/New Zealand Standard™

**Information processing systems—
Local area networks**

Part 2: Logical link control

ii

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT/1, Information Systems—Interconnection, to supersede AS/NZS 4802.2:1996. This Standard is identical with and has been reproduced from ISO/IEC 8802-2:1998, *Information technology—Telecommunications and information exchange between systems—Local and metropolitan area networks—Specific requirements,* Part 2: *Logical link control.*

The objective of this Standard is to provide designers of LAN networks using the ISO/IEC 8802 protocol with a specification of a logical link control sublayer.

The term 'normative' has been used in this Standard to define the application of the annex to which it applies. A 'normative' annex is an integral part of a Standard.

As this Standard is reproduced from an International Standard, the following applies:

(a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.

(b) In the source text 'this International Standard' should read 'this Australian/New Zealand Standard'.

(c) A full point should be substituted for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to equivalent Australian or Australian/New Zealand Standards, as follows:
