

AS 1627.6—1994

Australian Standard<sup>®</sup>

---

**Metal finishing—Preparation and  
pretreatment of surfaces**

**Part 6: Chemical conversion  
treatment of metals**

---

This Australian Standard was prepared by Committee MT/9, Metal Finishing. It was approved on behalf of the Council of Standards Australia on 28 September 1993 and published on 17 January 1994.

---

The following interests are represented on Committee MT/9:

Aluminium Development Council  
Australasian Institute of Metal Finishing  
Australian Chamber of Commerce and Industry  
Department of Defence  
Metal Trades Industry Association of Australia  
Royal Australian Chemical Institute  
Telecom Australia  
University of Queensland

Additional interests participating in preparation of Standard:

Austroads  
Blast Cleaning and Coating Association of Australia

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

*This standard was issued in draft form for comment as DR 92179.*

## PREFACE

This Standard was prepared under the direction of the Multitechnics Standards Policy Board by the Standards Australia Committee on Metal Finishing to supersede AS 1627.6—1977, *Metal finishing—Preparation and pretreatment of surfaces*, Part 6: *Phosphate treatment of iron and steel surfaces*.

It has been expanded to include phosphate conversion coatings for non-ferrous metals and chromate conversion coatings for aluminium and aluminium alloys.

The Standard is one of a series of Standards covering the preparation and pretreatment of metal surfaces used in metal finishing. Others in the series are as follows:

### AS

1627.0	Part 0:	Method selection guide for preparation and pretreatment of steel surfaces
1627.1	Part 1:	Cleaning using liquid solvents and alkaline solutions
1627.2	Part 2:	Power tool cleaning
1627.3	Part 3:	Flame descaling
1627.4	Part 4:	Abrasive blast cleaning
1627.5	Part 5:	Pickling steel surfaces
1627.7	Part 7:	Hand tool cleaning of metal surfaces
1627.9	Part 9:	Pictorial surface preparation standards for painting steel surfaces
1627.10	Part 10:	Cleaning and preparation of metal surfaces using acid solutions (non-immersion)

During the preparation of this Standard cognizance was taken of the following documents issued by the International Organization for Standardization:

ISO 3892:1980	Conversion coatings on metallic materials—Determination of coating mass per unit area—Gravimetric methods.
ISO 9717:1990	Phosphate conversion coatings for metals—Method of specifying requirements.
ISO 10546:1993	Chemical conversion coatings—Rinsed and non-rinsed chromate conversion coatings on aluminium and aluminium alloys.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

### © Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## CONTENTS

	<i>Page</i>
FOREWORD .....	4
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE .....	5
1.2 REFERENCED DOCUMENTS .....	5
1.3 DEFINITIONS .....	6
1.4 SAFETY PRECAUTIONS .....	6
1.5 DISPOSAL OF WASTE SOLUTIONS .....	7
SECTION 2 PHOSPHATE CONVERSION TREATMENT	
2.1 SCOPE OF SECTION .....	8
2.2 COATING CLASSIFICATION .....	8
2.3 REQUIREMENTS FOR PHOSPHATE COATINGS .....	8
2.4 METHODS OF APPLICATION .....	9
SECTION 3 CHROMATE CONVERSION TREATMENT OF ALUMINIUM AND ALUMINIUM ALLOYS	
3.1 SCOPE OF SECTION .....	13
3.2 COATING CLASSIFICATION .....	13
3.3 REQUIREMENTS FOR CHROMATE COATINGS .....	13
3.4 METHODS OF APPLICATION .....	15
APPENDICES	
A PURCHASING GUIDELINES .....	16
B TEST METHODS FOR THE DETERMINATION OF PHOSPHATE COATING MASS .....	17
C TEST METHOD FOR DETERMINING THE FREEDOM OF PHOSPHATE COATINGS FROM CORROSIVE RESIDUES .....	21
D DETERMINATION OF CORROSION RESISTANCE OF PHOSPHATE COATINGS .....	22
E GUIDANCE ON THE HEAT TREATMENT OF STEEL .....	24
F DETERMINATION OF CHROMATE COATING MASS ON ALUMINIUM AND ITS ALLOYS .....	26
G QUALITATIVE TESTING OF THE LAYER COMPOSITION OF CHROMATE COATINGS .....	28
H CHROMATE TREATMENT SEQUENCE OPTIONS .....	30
