

Australian Standard™

**High-voltage/low-voltage prefabricated
substations**

This Australian Standard was prepared by Committee EL-007, Power Switchgear. It was approved on behalf of the Council of Standards Australia on 11 April 2005. This Standard was published on 15 July 2005.

The following are represented on Committee EL-007:

Australian British Chamber of Commerce
Australian Electrical and Electronic Manufacturers Association
Energy Networks Association
Engineers Australia
Testing interests (Australia)

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 05011.

PREFACE

This Standard was prepared by the Standards Australia Committee EL-007, Power Switchgear.

The objective of this Standard is to ensure that prefabricated substations meet the needs of users in the areas of high-voltage and Low-voltage.

This Standard is identical with, and has been reproduced from, IEC 61330 Ed. 1.0 (1995), *High-voltage/low-voltage prefabricated substations*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'this international standard' should read 'this Australian Standard'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.
- (d) Any French text on figures should be ignored.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

CONTENTS

| | <i>Page</i> |
|------------------------------------------------------------------------------|-------------|
| 1 General..... | 1 |
| 1.1 Scope | 1 |
| 1.2 Normative references..... | 1 |
| 1.3 Definitions..... | 3 |
| 2 Service conditions..... | 5 |
| 2.1 Normal service conditions | 5 |
| 2.2 Special service conditions..... | 5 |
| 3 Requirements for components..... | 6 |
| 4 Ratings | 6 |
| 4.1 Rated voltages..... | 7 |
| 4.2 Rated insulation levels | 7 |
| 4.3 Rated frequency and number of phases | 7 |
| 4.4 Rated normal currents and temperature rise | 7 |
| 4.5 Rated short-time withstand currents..... | 7 |
| 4.6 Rated peak withstand currents | 7 |
| 4.7 Rated duration of short circuit | 8 |
| 4.8 Rated supply voltage of operating devices and auxiliary circuits | 8 |
| 4.9 Rated supply frequency of operating devices and auxiliary circuits | 8 |
| 4.10 Rated maximum power of the prefabricated substation | 8 |
| 4.11 Rated class of enclosure..... | 8 |
| 5 Design and construction..... | 8 |
| 5.1 Earthing | 8 |
| 5.2 Auxiliary equipment | 9 |
| 5.3 Nameplate | 9 |
| 5.4 Degree of protection and internal fault | 9 |
| 5.5 Enclosure | 11 |
| 5.6 Sound emission | 13 |
| 6 Type tests | 13 |
| 6.1 Dielectric tests | 13 |
| 6.2 Temperature-rise tests..... | 16 |
| 6.3 Short-time and peak withstand current tests on earthing circuits | 18 |
| 6.4 Functional tests | 18 |
| 6.5 Verification of the degree of protection..... | 18 |
| 6.6 Mechanical tests | 18 |
| 7 Routine tests..... | 19 |
| 7.1 Voltage withstand tests on auxiliary circuits | 19 |
| 7.2 Functional tests | 19 |
| 7.3 Verification of correct wiring..... | 19 |
| 7.4 Tests after assembly on site | 19 |
| 8 Guide to the selection of prefabricated substations for service | 19 |
