ISO/IEC 15475-2:2002

AS/NZS ISO/IEC 15475.2

Australian/New Zealand Standard™

**Information technology—CDIF transfer  
format**

**Part 2: Syntax SYNTAX.1**

### **AS/NZS ISO/IEC 15475.2:2003**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-015, Software Engineering. It was approved on behalf of the Council of Standards Australia on 6 May 2003 and on behalf of the Council of Standards New Zealand on 8 May 2003. It was published on 19 June 2003.

---

The following are represented on Committee IT-015:

Australian Computer Society  
Australian Information Industry Association  
Australian Society for Technical Communication (NSW)  
Australian Software Metrics Association  
Griffith University  
New Zealand Organisation for Quality  
Quality Society of Australasia  
Software Engineering Australia (QLD)  
Software Quality Association (ACT)  
Software Quality Association (NSW)  
Software Verification Research Centre  
Sydney SPIN Group (Software Process Improvement Network)  
Systems Engineering Society of Australia  
University of New South Wales  
University of South Australia  
University of Technology, Sydney

#### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-015, Software Engineering.

This Standard is identical with, and has been reproduced from ISO/IEC 15475-2:2002, *Information technology—CDIF transfer format—Part 2: Syntax SYNTAX.1*.

The objective of this Standard is to describe the standard CDIF transfer syntax.

This Standard is Part 2 of AS/NZS ISO/IEC 15475, *Information technology—CDIF transfer format*, which is published in parts as follows:

Part 1: General rules for syntaxes and encodings

Part 2: Syntax SYNTAX.1 (this Standard)

Part 3: Encoding ENCODING.1

The terms ‘normative’ and ‘informative’ are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

As this Standard is reproduced from an international standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>
