

AS/NZS 2179.2(Int):1998
(Expires 5 June 2000)

Interim
Australian/New Zealand Standard™

**Specifications for rainwater goods,
accessories and fasteners**

**Part 2: PVC rainwater goods and
accessories**

AS/NZS 2179.2(Int):1998

This Interim Joint Australian/New Zealand Standard was prepared by Joint Technical Committee WS/20, Stormwater. It was approved on behalf of the Council of Standards Australia on 3 April 1998 and on behalf of the Council of Standards New Zealand on 12 May 1998. It was published on 5 June 1998.

The following interests are represented on Committee WS/20:

Association of Consulting Engineers Australia
Association of Hydraulic Services Consultants Australia
Australian Aluminium Council
Australian Building Codes Board
Australian Chamber of Manufactures
Australian Chamber of Commerce and Industry
Australian Department of Administrative Services
Australian Institute of Loss Adjusters
Bureau of Meteorology (Australia)
Department of Land and Water Conservation, NSW
Housing Industry Association
Local Government Office, Tasmania
Master Builders Australia
Master Plumbers and Mechanical Contractors Association of NSW
Master Plumbers Australia
Metal Building Products Manufacturers Association (Australia)
New Zealand Manufacturers Federation
New Zealand Water and Wastes Association
Plastics and Chemicals Industries Association (Australia)
Plastics Institute of New Zealand
Plumbing Industry Board, Victoria
Queensland Department of Local Government and Planning
University of Technology, Sydney

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Interim Joint Australian/New Zealand Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WS/20, Stormwater.

The date of expiry for comment is two years after publication, at which time this Interim Australian/New Zealand Standard will be confirmed, withdrawn or revised in the light of public comment, or published as a Joint Australian/New Zealand Standard. During the life of this document the committee will monitor all comment as it is received.

This Interim Standard is part of a series of Standards, as follows:

AS/NZS

2179 Specifications for rainwater goods, accessories and fasteners

2179.1 Part 1: Metal shape or sheet rainwater goods, and metal accessories and fasteners

2179.2 Part 2: PVC rainwater goods and accessories (this Standard)

The objective of this Interim Standard is to provide manufacturers with requirements for non-metal rainwater goods and accessories to determine fitness for purpose.

The test criteria specified apply to pipes and fittings at the time of manufacture and should not be used to assess the results from tests on pipes or fittings which have been in service.

The AS 1462 series at the time of publication of this Standard is in the process of a Joint Standards Australia/Standards New Zealand review and will be published as a AS/NZS 1462 series. As these are published the AS 1462 documents referenced in this Standards should be replaced by the equivalent AS/NZS 1462 document.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the Appendix to which they apply. A 'normative' Appendix is an integral part of a Standard, whereas an 'informative' Appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
