AS/NZS ISO 10012:2004 ISO 10012:2003

Australian/New Zealand Standard™

Measurement management systems— Requirements for measurement processes and measuring equipment

#### AS/NZS ISO 10012:2004

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee QR-009, Quality Management Measurement and Test. It was approved on behalf of the Council of Standards Australia on 13 April 2004 and on behalf of the Council of Standards New Zealand on 16 April 2004. It was published on 9 June 2004.

The following are represented on Committee QR-009:

Australian Government Analytical Laboratories Australian Organisation for Quality CSIRO Telecommunications and Industrial Physics Certification Bodies (Australia) Commonwealth Department of Transport and Regional Services Institute of Materials Engineering Australasia Institution of Engineers Australia International Accreditation New Zealand Measurement Standards Laboratory New Zealand NSW Health Department National Association of Testing Authorities Australia National Standards Commission

#### Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 03251.

# Australian/New Zealand Standard™

## Measurement management systems— Requirements for measurement processes and measuring equipment

Originated in Australia as AS 2415—1980. Originated in New Zealand as Joint Standard NZS 10012.1:1993. Previous Australian edition AS 3912.1—1993. AS 3912.1—1993 and NZS 10012.1:1993 jointly revised, amalgamated and redesignated as AS/NZS ISO 10012:2004

#### PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee QR-009, Quality Management Measurement and Test to supersede AS 3912.1-1993/NZS 10012.1:1993, *Ouality assurance requirements for measuring equipment, Part 1: Metrological confirmation system* for measuring equipment.

This Standard is identical with, and has been reproduced, from ISO 10012:2003, Measurement management systems—Requirements for measurement processes and measuring equipment.

The objective of this Standard is to specify generic requirements and provide guidance for the management of measurement processes and metrological confirmation of measuring equipment used to support and demonstrate compliance with metrological requirements.

As this Standard is reproduced from an international standard, the following applies:

- Its number appears on the cover and title page while the international standard number appears (a) only on the cover.
- (b) In the source text 'this International Standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

Australian/New Zealand Standard
