

Australian/New Zealand Standard™

**Diesel engine systems for underground
coal mines**

Part 3: Maintenance

AS/NZS 3584.3:2005

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME-018, Mining Equipment. It was approved on behalf of the Council of Standards Australia on 18 November 2004 and on behalf of the Council of Standards New Zealand on 17 December 2004.
This Standard was published on 16 March 2005.

The following are represented on Committee ME-018:

Australasian Institute of Mining and Metallurgy
Australian Chamber of Commerce and Industry
Australian Coal Association
Bureau of Steel Manufacturers of Australia
Chamber of Minerals and Energy of Western Australia
Department of Infrastructure, Energy and Resources, Tasmania
Department of Labour New Zealand
Department of Mineral Resources New South Wales
Department of Minerals and Energy, W.A.
Department of Minerals and Energy (Qld)
Department of Natural Resources and Environment, Vic
Institution of Engineers Australia
Institution of Mining Engineers, Australia
Minerals Council of Australia
South Australian Chamber of Mines and Energy

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 04286.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-018, Mining Equipment.

The objective of this Standard is to provide guidance for ensuring diesel engine systems used underground in coal mines are maintained in an 'as approved and certified' condition and comply with safety requirements.

This Standard is part of a series on diesel engine systems for underground coal mines, as follows:

AS/NZS

3584 Diesel engine systems for underground coal mines

3584.1 Part 1: Fire protected

3584.2 Part 2: Explosion protected

3584.3 Part 3: Maintenance (this Standard)

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	4
1.2 REFERENCED DOCUMENTS	4
1.3 DEFINITIONS	5
SECTION 2 PERSONNEL	
2.1 SUPERVISION	8
2.2 TRAINERS.....	8
2.3 TRAINING.....	8
SECTION 3 MODIFICATION/OVERHAUL WORKSHOPS	
3.1 CAPABILITIES	10
3.2 TOOLS	10
3.3 DOCUMENTATION.....	10
SECTION 4 MAINTENANCE MANAGEMENT SYSTEM	
4.1 PROVISION.....	11
4.2 QUALITY ASSURANCE	11
4.3 FREQUENCY	11
4.4 TESTING	11
4.5 REPORTING.....	11
4.6 DAMAGE.....	12
4.7 DEFECTS.....	12
4.8 RECORDS.....	12
SECTION 5 MAINTENANCE PROCEDURES	
5.1 WORKSHOP.....	13
5.2 PLACES OF WORK	13
5.3 FREQUENCY	13
5.4 SPECIFIC CHECKING.....	14
5.5 CODED MAINTENANCE.....	15
APPENDICES	
A TRAINING MODULES	16
B BIBLIOGRAPHY FOR VERIFICATION OF WORKSHOP CAPABILITIES	18
C UNDILUTED EXHAUST EMISSION TESTING.....	19
D REQUIREMENTS FOR HYDROSTATIC TESTING.....	21
E EXAMPLES OF CODED MAINTENANCE	22
