

Australian/New Zealand Standard™

**Information and documentation—RFID
in libraries**

Part 3: Fixed length encoding

AS/NZS ISO 28560.3:2015

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-019, Information and Documentation, Information Technology—Learning, Education, Training and Research. It was approved on behalf of the Council of Standards Australia on 30 November 2015 and on behalf of the Council of Standards New Zealand on 23 November 2015. This Standard was published on 23 December 2015.

The following are represented on Committee IT-019:

Australian Computer Society
Australian Library and Information Association
Council of Australian University Librarians
CSIRO
Education and Communities, NSW
Institute for Metadata Management
La Trobe University
National and State Libraries Australasia
National Library of New Zealand
Northern Territory Library
Tertiary Library Networks
University of Southern Queensland
University of Waikato

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-019, Information and Documentation, Information Technology—Learning, Education, Training and Research, to supersede AS/NZS ISO 28560.3:2013.

The objective of this Standard is to specify a data model and encoding rules for the use of radio frequency identification (RFID) tags for items appropriate for the needs of all types of libraries (including national, academic, public, corporate, special, and school libraries).

This Standard is identical with, and has been reproduced from ISO 28560-3:2014, *Information and documentation—RFID in libraries, Part 3: Fixed length encoding*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this part of ISO 28560’ should read ‘this Australian/New Zealand Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian/New Zealand Standard</i>
ISO	AS/NZS ISO
28560 Information and documentation—RFID in libraries	28560 Information and documentation—RFID in libraries
28560-1 Part 1: Data elements and general guidelines for implementation	28560.1 Part 1: Data elements and general guidelines for implementation

Only normative references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

CONTENTS

1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Requirements	3
	4.1 Data elements	3
	4.2 RFID air interface	3
	4.3 Data protocol	3
5	General encoding rules	3
	5.1 Distinguishing from other applications and encodings	3
	5.2 Writing/reading direction	3
	5.3 Memory area layout	4
	5.4 Strings and integers	4
	5.5 Writing the tag	5
	5.6 Reading optimization	5
	5.7 Profiling	5
	5.8 Locking	5
	5.9 Migration	5
6	Data elements	5
7	Data blocks	8
	7.1 Types of data blocks	8
	7.2 Basic block	9
	7.3 Special blocks	10
	7.4 Structured extension blocks	11
	7.5 Library extension block	12
	7.6 Acquisition extension block	12
	7.7 Library supplement block	13
	7.8 Title block	14
	7.9 ILL block	14
	7.10 Unstructured extension blocks	15
	Annex A (informative) Information about ISO 28560 RFID in libraries	16
	Annex B (informative) Encoding examples	17
	Annex C (normative) Cyclic redundancy check (CRC)	21
	Annex D (informative) Reading optimization	22
	Annex E (informative) Guidelines for regional profiling	23
	Bibliography	24
