

AS 1306—1985

Australian Standard[®]

**HIGH VOLTAGE A.C.
SWITCHGEAR AND
CONTROLGEAR—
DISCONNECTORS (ISOLATORS)
AND EARTHING SWITCHES**

[Title allocated by the Defence Cataloguing Authority:
SWITCHGEAR AND CONTROLGEAR, ELECTRICAL
(Disconnectors and Earthing Switches, A.C. 1 kV and above)]

This Australian standard was prepared by Committee EL/17, Power Switchgear. It was approved on behalf of the Council of the Standards Association of Australia on 17 April 1985 and published on 12 July 1985.

The following interests are represented on Committee EL/17:

Australian British Chamber of Commerce
Australian Electrical and Electronic Manufacturers Association
Confederation of Australian Industry
Electrical Supply Association of Australia
Institution of Engineers Australia
Railways of Australia Committee
Testing Authorities

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 84060.

PREFACE

This edition of this standard was prepared by the Association's Committee on Power Switchgear to supersede AS 1306—1977, High Voltage Isolators (Disconnectors) and Earthing Switches.

It applies to disconnectors (previously referred to as isolators), earthing switches and combinations of disconnectors and earthing switches designed for use indoors or outdoors on alternating current systems of rated voltages exceeding 1000 V.

This standard is based on IEC 129 and IEC document 17A(Central Office)162, which proposed the amendment of IEC 129 to line up with the IEC standard covering the common requirements for high-voltage a.c. switchgear and controlgear. Where this standard deviates technically from IEC 129, as amended by IEC document 17A(Central Office)162, this fact is indicated by a rule in the margin against the clause or part thereof affected and a summary of such deviations is given in the annex.

The appendices in this edition cover a procedure for arranging a pre-arcing condition when testing earthing switches for making capacity at reduced voltage, preferred nomenclature for types of disconnectors and earthing switches, and items subject to agreement between the purchaser and the manufacturer. Other matters which were dealt with in the appendices of the previous edition are now included in the body of this edition.

This edition reflects a substantial editorial rearrangement of the previous edition.

The clause numbering of this edition closely follows that of AS 2650 and where reference is made directly to clauses of the same number in AS 2650 without amendment thereto these clauses are shown in the Contents in bold. Clauses having numbers with a component part of 101 or greater are specific to this standard only.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

NOTE: The listing of clauses in **bold** below indicates that those clauses in AS 2650 apply without amendment in this standard.

	<i>Page</i>
1. SCOPE AND GENERAL	
1.1 Scope	5
1.2 Application	5
1.3 Referenced Documents	5
2. SERVICE CONDITIONS	
3. DEFINITIONS	
3.1 General	5
3.101 General Terms	5
3.102 Switching Devices	5
3.103 Parts of Switching Devices	6
3.104 Characteristic Quantities	6
4. RATINGS	
4.0 List of ratings	6
4.1 Rated Voltage	7
4.2 Rated Insulation Level	7
4.3 Rated Frequency	7
4.4 Rated Normal Current and Temperature-rise	7
4.5 Rated Short-time Withstand Current	7
4.6 Rated Peak Withstand Current	7
4.7 Rated Duration of Short-circuit	7
4.8 Rated Supply Voltage of Closing and Opening Devices and Auxiliary Circuits	7
4.9 Rated Supply Frequency of Operating Devices and Auxiliary Circuits	7
4.10 Rated Pressure of Compressed Gas Supply for Operation	7
4.11 Rated Mechanical Load of Terminals	7
4.101 Rated Short-circuit Making Current	9
4.102 Rated Contact Zone	9
4.103 Rated Values of Maximum Force Required for Manual Operation	12
4.104 Behaviour when Carrying Rated Peak Withstand Current and Rated Short-time Withstand Current	12
4.105 Behaviour of Earthing Switches when Making Short-circuit Currents	12
4.106 Coordination of Rated Voltages, Rated Normal Currents, Rated Short-time Withstand Currents and Rated Peak Withstand Currents	12
5. DESIGN AND CONSTRUCTION	
5.1 Requirements for Liquids	12
5.2 Requirements for Gases	12
5.3 Earthing	14
5.4 Auxiliary Equipment	14
5.5 Dependent Power Closing—Opening	14
5.6 Stored Energy Closing—Opening	14
5.7 Operation of Releases	14
5.8 Low and High Pressure Interlocking Devices	14
5.9 Nameplates	14
5.10 Terminals	14
