

Safety of machinery—Equipment for power driven parking of motor vehicles—Safety and EMC requirements for design, manufacturing, erection and commissioning stages (EN 14010:2003, MOD)

AS 5124:2017, Safety of machinery—Equipment for power driven parking of motor vehicles—Safety and EMC requirements for design, manufacturing, erection and commissioning stages (EN 14010:2003, MOD), is a modified adoption of EN 14010:2003, Safety of machinery—Equipment for power driven parking of motor vehicles—Safety and EMC requirements for design, manufacturing, erection and commissioning stages, and is reproduced with the permission of CEN, Avenue Marnix 17, B-1000 Brussels, Belgium. All exploitation rights of the European Standards in any form and by any means are reserved worldwide to CEN and its National Members, and no reproduction may be undertaken without express permission in writing by CEN through Standards Australia Limited.

This Australian Standard® was prepared by Committee ME-089, Mechanical Parking Devices. It was approved on behalf of the Council of Standards Australia on 23 September 2016

This Standard was published on 1 March 2017.

The following are represented on Committee ME-089:

- Australasian Fire and Emergency Service Authorities Council
- Australian Industry Group
- CIBSE ANZ
- Consult Australia
- Fire Protection Association Australia
- Insurance Council of Australia
- Master Builders Australia
- Property Council of Australia
- WorkSafe Victoria

This Standard was issued in draft form for comment as DR AS 5124:2016.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

#### Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au** 

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

#### **PREFACE**

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-089, Mechanical Parking Devices.

The objective of this Standard is to provide requirements for the safe design, installation and servicing of car storage devices.

This Standard is an adoption with national modifications and has been reproduced from EN 14010:2003+A1:2009, Safety of machinery—Equipment for power driven parking of motor vehicles—Safety and EMC requirements for design, manufacturing, erection and commissioning stages, and has been varied as indicated to take account of Australian conditions. The modifications are listed in Appendix ZZ. Amendment A1 2009 is incorporated in the text of EN 14010, and designated A1. Appendix ZX provides additional guidance for the fire risk of the installation and operation of automatic, semi-automatic and manual operation systems for power-driven parking of motor vehicles (car stackers).

As this Standard is reproduced from a European Standard, the following applies:

- (a) In the source text 'this European Standard' should read 'this Australian Standard'.
- (b) A full point substitutes for a comma when referring to a decimal marker.

None of the normative references in the source document have been adopted as Australian or Australian/New Zealand Standards.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the annex or appendix to which they apply. A 'normative' annex or appendix is an integral part of a Standard, whereas an 'informative' annex or appendix is only for information and guidance.

## CONTENTS

Forewo	ord	3
Introdu	ıction	4
1	Scope	5
2	Normative references	6
3	Terms and definitions	8
4	List of significant hazards	10
5	Safety and EMC requirements and/or safety measures	16
5.1 5.2	General  Control devices and equipment used for safety purposes	16
5.2 5.3	Electrical equipment	
5.4	Hydraulic systems and hydraulic equipment	
5.5	Load carrier	25
5.6	Lifting elements	
5.7 5.8	Transmission elements	
5.8 5.9	Non-automatic horizontally moving parking equipment in areas accessible to the user	
5.3 5.10	Non-automatic vertically moving parking equipment in areas accessible to the user	
5.11	Automatic parking equipment	
5.12	Design of the transfer area	
6	Verification of safety and EMC requirements and/or measures	40
6.2	Special verification	
6.3	Type testing	46
7	Information for use	46
<i>.</i> 7.1	Instruction handbook	
7.2	Marking	49
Annex	A (normative) Design criteria	51
Annex	B (informative) Automatic parking equipment	52
Annex	C (normative) Design criteria	53
Annex	ZA (informative) A Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC 4	.55
Annex	ZB (informative) A Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC	56
Annex	ZC (informative) A Relationship between this European Standard and the Essential Requirements of EU Directive 2004/108/EC 4	57
Bibliog	ıraphy	58
