Australian/New Zealand Standard™

**Information technology—CDIF semantic
metamodel**

Part 3: Data definitions

AS/NZS ISO/IEC 15476.3:2006

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-015, Software and Systems Engineering. It was approved on behalf of the Council of Standards Australia on 27 October 2006 and on behalf of the Council of Standards New Zealand on 10 November 2006. This Standard was published on 12 December 2006.

The following are represented on Committee IT-015:

Australian Computer Society
Australian Electrical and Electronic Manufacturers Association
Australian Society or Technical Communications
Australian Software Metrics Association
Engineers Australia/ACTS Joint Board in Software Engineering
Griffith University
National Association of Testing Authorities Australia
National ICT Australia
New Zealand Organisation for Quality
Software Quality Association, ACT
Software Quality Association, NSW
Systems Engineering Society of Australia
The University of Queensland
University of Auckland, NZ
University of South Australia
University of Technology, Sydney
Vendor Interests, NZ

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 06511.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-015, Software and Systems Engineering.

The objective of this Standard is to provide people vendors and users of modelling tools and meta-data repositories with a definition of Data Definition Subject Area of the CDIF semantic metamodel. (This subject area contains meta-objects that are used as a basis of the data components of other subject area standards, and also meta-relationships and meta-attributes that are applicable to all data-related meta-objects).

This Standard is identical with, and has been reproduced from ISO/IEC 15476-3:2006, *Information technology—CDIF semantic metamodel—Part 3: Data definitions*.

As this Standard is reproduced from an international standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>	
ISO		AS	
31	Quantities and units	2900	Quantities and units
31-1	Part 1: Space and time	2900.1	Part 1: Space and time

15474	Information technology—CDIF framework	15474	Information technology—CDIF framework
15474-1	Part 1: Overview	15474.1	Part 1: Overview
15474-2	Part 2: Modelling and extensibility	15474.2	Part 2: Modelling and extensibility
15476	Information technology—CDIF semantic metamodel	15476	Information technology—CDIF semantic metamodel
15476-1	Part 1: Foundation	15476.1	Part 1: Foundation
15476-2	Part 2: Common	15476.2	Part 2: Common
15476-4	Part 4: Data models	15476.4	Part 4: Data models

Only normative references in the source document that have been adopted as Australian or Australian/New Zealand Standard have been listed.

CONTENTS

	<i>Page</i>
1	Scope 1
2	Conformance 2
2.1	General 2
2.2	Input conformance 2
2.3	Output conformance 2
2.4	Round-trip conformance 3
3	Normative references 3
4	Terms and definitions 4
4.1	From other International Standards 4
4.1.1	ISO/IEC 15474-1 4
4.1.2	ISO/IEC 13238-1 4
4.1.3	For this International Standard 4
5	Symbols (and abbreviated terms) 5
5.1	Naming, diagramming and definition conventions 5
5.2	Abbreviations 5
6	Data definition subject area overview 5
6.1	Introduction 5
6.2	Data Typing 5
6.3	The General Structuring Mechanism 5
6.3.1	Introduction 5
6.3.2	Meta-entities and Meta-relationships 5
6.3.3	DefinitionObject and ComponentObject 7
6.4	Alternate Decompositions 8
6.5	Pointers and Arrays 10
6.6	Data Types 10
6.7	Constraining Data Type and Attribute Values 11
6.8	Units for Numeric DataTypes 12
6.9	Void and Unknown Data Types 13
6.10	Computable Languages 13
6.11	Formats for Computable Values 13
6.12	Diagrams 16
7	Data definitions subject area summary 21
7.1	AttributableMetaObject classification hierarchy 21
7.2	MetaEntity summary 23
7.3	MetaRelationship summary 37
8	Data definitions subject area specification 39
8.1	Introduction 39
8.1.1	Subject area definition 39
8.2	Meta-entity definitions 39
8.2.1	AggregateDataType 39
8.2.2	ApproximateNumericType 40
8.2.3	ArrayQualifier 41
8.2.4	Attribute 42
8.2.5	BasicDataType 42
8.2.6	BinaryCodedDecimalType 43
8.2.7	BinaryType 43
8.2.8	BooleanType 44
8.2.9	BoundedArrayQualifier 44
8.2.10	CartesianComplexType 45
