AS/NZS ISO/IEC 12207:2013

Australian/New Zealand Standard™

**Systems and software engineering—
Software life cycle processes**

AS/NZS ISO/IEC 12207:2013

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-015, Software and System Engineering. It was approved on behalf of the Council of Standards Australia on 7 November 2013 and on behalf of the Council of Standards New Zealand on 31 October 2013. This Standard was published on 18 December 2013.

The following are represented on Committee IT-015:

Australian Computer Society
Australian Society for Technical Communication, NSW
Charles Sturt University
Department of Defence, Australia
Griffith University
Institute of IT Professionals New Zealand
La Trobe University
National Association of Testing Authorities Australia
National ICT Australia
New Zealand Organisation for Quality
NSW Business Chamber Limited
Quantitative Enterprise Software Performance
Systems Engineering Society of Australia
University of Technology, Sydney

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS ISO/IEC 12207.

AS/NZS ISO/IEC 12207:2013

Australian/New Zealand Standard™

Systems and software engineering— Software life cycle processes

Originated as AS/NZS ISO/IEC 12207:1997.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-015, Software and System Engineering.

The objective of this Standard is to provide the foundation to facilitate evolution to an integrated and fully harmonized treatment of software life cycle processes.

This Standard is identical with, and has been reproduced from ISO/IEC 12207:2008, *Systems and software engineering—Software life cycle processes*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ISO/IEC 12207 should read this Australian/New Zealand Standard.
- (b) A full point substitutes for a comma when referring to a decimal marker.

None of the normative references in the source document have been adopted as Australian or Australian/New Zealand Standards.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

CONTENTS

1	Overview	1
1.1	Scope	1
1.2	Purpose.....	1
1.3	Limitations	1
2	Conformance.....	2
2.1	Intended usage.....	2
2.2	Full conformance	2
2.3	Tailored conformance	2
3	Normative references	2
4	Terms and definitions.....	3
5	Application of this International Standard	9
5.1	Key concepts of this International Standard	9
5.1.1	Relationship of software products and software services.....	9
5.1.2	Relationship between systems and software	9
5.1.3	Organizations and parties.....	10
5.1.4	Organization-level and project-level adoption.....	10
5.1.5	Tailoring	11
5.1.6	Temporal relationships among the processes	11
5.1.7	Evaluation versus verification, and validation	11
5.1.8	Criteria for processes.....	11
5.1.9	Description of processes	11
5.1.10	General Characteristics of processes	12
5.1.11	Decomposition of processes.....	12
5.1.12	Life cycle models and stages	12
5.2	Organization of this International Standard.....	13
5.2.1	Categories of Life Cycle Processes	13
5.2.2	Summary of Life Cycle Processes	14
5.2.3	Process Reference Model	18
6	System Life Cycle Processes	18
6.1	Agreement Processes	18
6.1.1	Acquisition Process	18
6.1.2	Supply Process	22
6.2	Organizational Project-Enabling Processes	25
6.2.1	Life Cycle Model Management Process	25
6.2.2	Infrastructure Management Process	26
6.2.3	Project Portfolio Management Process.....	27
6.2.4	Human Resource Management Process	29
6.2.5	Quality Management Process.....	31
6.3	Project Processes.....	32
6.3.1	Project Planning Process	32
6.3.2	Project Assessment and Control Process	33
6.3.3	Decision Management Process	34
6.3.4	Risk Management Process	36
6.3.5	Configuration Management Process	38
6.3.6	Information Management Process	39
6.3.7	Measurement Process.....	41
6.4	Technical Processes	42
6.4.1	Stakeholder Requirements Definition Process	42
6.4.2	System Requirements Analysis Process	45
6.4.3	System Architectural Design Process.....	46
