AS IEC 60601.1.9:2017 IEC 60601-1-9:2007+AMD1:2013 CSV (ED.1.1)

Medical electrical equipment

Part 1.9: General requirements for basic safety and essential performance— Collateral Standard: Requirements for environmentally conscious design

This is a free page sample. Access the full version online.

This Australian Standard® was prepared by Committee HE-003, Medical Electrical Equipment. It was approved on behalf of the Council of Standards Australia on 10 May 2017. This Standard was published on 28 June 2017.

The following are represented on Committee HE-003:

- Australasian College of Physical Scientists and Engineers in Medicine
- Australian and New Zealand College of Anaesthetists
- Australian Chamber of Commerce and Industry
- Australian Radiation Protection and Nuclear Safety Agency
- Australian Society of Anaesthetists
- College of Biomedical Engineering Engineers Australia
- Department of Defence (Australian Government)
- Engineers Australia
- Testing Interests (Australia)
- Therapeutic Goods Administration

This Standard was issued in draft form for comment as DR AS IEC 60601.1.9:2017.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

NOTES

1

PREFACE

This Standard was prepared by the Standards Australia Committee HE-003, Medical Electrical Equipment.

The objective of this Standard is to improve the environmental impact for the entire range of medical equipment (ME), taking into account all stages of the product life cycle: product specification, design, manufacturing, sales, logistics, installation, use and end of life management.

This Standard is identical with, and has been reproduced from IEC 60601-1-9:2007+AMD1:2013 CSV (ED 1.1), Medical electrical equipment, Part 1-9: General requirements for basic safety and essential performance—Collateral Standard: Requirements for environmentally conscious design.

As this Standard is reproduced from an International Standard, the following applies:

(a) In the source text 'this International Standard' should read 'this Australian Standard'.

(b) A full point substitutes for a comma when referring to a decimal marker.

None of the normative references in the source document have been adopted as Australian or Australian/New Zealand Standards.

This is a free preview. Purchase the entire publication at the link below:
