Australian/New Zealand Standard[®]

**Information technology—
Coded representation of picture and
audio information—
Progressive bi-level image
compression**

AS/NZS 4472:1997

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT/1, Information Systems—Interconnection. It was approved on behalf of the Council of Standards Australia on 24 February 1997 and on behalf of the Council of Standards New Zealand on 21 February 1997. It was published on 5 June 1997.

The following interests are represented on Committee IT/1:

Australian Bankers Association
Australian Bureau of Statistics
Australian Computer Society
Australian Computer Users Association
Australian Information Industry Association
Australian Vice Chancellors Committee
Department of Defence, Australia
Department of Industry, Science and Technology, Australia
Government Computing Service, New Zealand
Information Exchange Steering Committee, Australia
Institute of Information and Communication Technologies, CSIRO, Australia
Telstra Corporation, Australia
Telecom New Zealand

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 96341.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT/1, Information Systems—Interconnection. It is identical with and has been reproduced from ISO/IEC 11544:1993, *Information technology—Coded representation of picture and audio information—Progressive bi-level image compression*, including Technical Corrigendum 1:1995. This addition has been bound at the rear of this Standard and text affected marked by a marginal bar.

The objective of this Standard is to provide users requiring to digitally transmit bi-level images with a specification for a coding method having progressive, progressive-compatible sequential, single-progression and single-progression sequential modes.

Users of this Standard are advised by Standards Australia and Standards New Zealand, under arrangements made with ISO and IEC, as well as certain other Standards organizations, that the number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purpose of this Standard, the source text should be modified as follows:

- (a) *Terminology* The words ‘this Australian/New Zealand Standard’ should replace the words ‘this International Standard’ wherever they appear.
- (b) *Decimal marker* Substitute a full point for a comma where it appears as a decimal marker.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.

Contents	Page
1 Scope	1
2 Normative references	1
3 Definitions	1
4 Symbols and abbreviations	2
4.1 Acronyms	2
4.2 Symbolic constants	2
4.3 Mathematical symbols, operators, and indicators	3
4.4 Variables with mnemonic names	3
5 Conventions	3
5.1 Flow diagram conventions and symbols	3
5.2 Template graphics	3
5.3 Spatial phase	4
5.4 Data structure graphics	4
6 Requirements	7
6.1 General rules	7
6.2 Data organization	7
6.3 Resolution reduction	12
6.4 Differential-layer typical prediction	13
6.5 Lowest-resolution-layer typical prediction	16
6.6 Deterministic prediction (DP)	19
6.7 Model templates and adaptive templates	23
6.8 Arithmetic coding	26
7 Test methods and datastream examples	43
7.1 Arithmetic coding	44
7.2 Parameterized algorithm	51
7.3 Datastream examples	55
