Australian Standard<sup>®</sup>

---

**Information processing systems—  
Open Systems Interconnection—  
Basic reference model**

**Part 3: Naming and addressing**

---

This Australian Standard was prepared by Committee IT/1, Information Systems—Interconnection. It was approved on behalf of the Council of Standards Australia on 14 August 1990 and published on 12 November 1990.

---

The following interests are represented on Committee IT/1:

Aussat  
Australian Association of Permanent Building Societies  
Australian Bankers' Association  
Australian Bureau of Statistics  
Australian Committee of Directors and Principals  
Australian Computer Equipment Manufacturers Association  
Australian Computer Society  
Australian Computer Users Association  
Australian Computing Services Association  
Australian Information Industry Association  
Australian Vice Chancellors Committee  
CSIRO, Institute of Information and Communication Technologies  
Department of Defence  
Department of Industry, Technology and Commerce  
Information Exchange Steering Committee  
Life Insurance Federation of Australia  
OTC  
Public Service Board, N.S.W.  
Telecom Australia

Additional interests participating in preparation of Standard:

Computer consultants

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

## PREFACE

This Standard was prepared by the Standards Australia Committee on Information Systems—Interconnection. It is identical with and has been reproduced from International Standard ISO 7498-3: 1988, *Information processing systems—Open Systems Interconnection—Basic Reference Model—Part 3: Naming and Addressing*.

The Standard is one of a series of Open Systems Interconnection (OSI) Standards which are currently under development. Since OSI Standards are developmental, there may be some minor difficulties encountered in their implementation. For this reason, Standards Australia will be providing a limited interpretation service to coordinate and disseminate information concerning difficulties which are identified in using this Standard.

Under arrangements made between Standards Australia and the International Standards Bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian Standard are advised of the following:

- (a) Copyright is vested in Standards Australia.
- (b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purpose of this Australian Standard, the text of the ISO Standard given herein should be modified as follows:

- (i) *Terminology* The words ‘Australian Standard’ should replace the words ‘International Standard’ wherever they appear.
- (ii) *References* The references to International Standards should be replaced by references to Australian Standards as follows:

<i>Reference to International Standard</i>	<i>Australian Standard</i>
ISO	AS
7498 Information processing systems—Open Systems Interconnection—Basic Reference Model	2777 Information processing systems—Open Systems Interconnection—Basic reference model
7498/Add1 Information processing systems—Open Systems Interconnection—Basic Reference Model—Addendum 1: Connectionless-mode transmission	2777 Supp.1 Information processing systems—Open Systems Interconnection—Basic reference model—Supplement 1: Connectionless mode transmission
7498-4 Information processing systems—Open Systems Interconnection—Basic Reference Model—Part 4: Management Framework	2777.4 Information processing systems—Open Systems Interconnection—Basic reference model—Part 4: Management framework
8348/Add2 Information processing systems—Data communication—Network Service Definition—Addendum 2: Network layer addressing	2994 Supp. 1 Information processing systems—Data communication—Network service definition—Supplement 1: Network layer addressing

## © Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## CONTENTS

	<i>Page</i>
Introduction	4
<b>1</b> Scope	5
<b>2</b> Normative references	5
<b>3</b> Definitions	5
<b>4</b> Abbreviations	7
<b>5</b> Basic concepts of naming	7
<b>6</b> OSI naming and addressing concepts and the correct use of addresses	8
<b>6.1</b> The naming of real open systems	8
<b>6.2</b> The naming and addressing of elements of an (N)-layer	8
<b>6.3</b> The correct use of (N)-addresses	8
<b>7</b> OSI addressing model	9
<b>7.1</b> Associations between peer (N)-entities	9
<b>7.2</b> Attachment of (N)-entities to (N)-SAPs	9
<b>7.3</b> (N)-addresses and (N)-SAPs	9
<b>7.4</b> (N)-directory-functions and directory facilities	11
<b>8</b> Addressing information and (N)-services	11
<b>8.1</b> Introduction	11
<b>8.2</b> Address parameters	12
<b>8.3</b> Called-(N)-address	12
<b>8.4</b> Calling-(N)-address	12
<b>8.5</b> Responding-(N)-address	13
<b>9</b> Addressing information and (N)-protocols	13
<b>9.1</b> Introduction	13
<b>9.2</b> Addressing information in (N)-PAI	13
<b>9.3</b> Assignment of values to elements of (N)-PAI	14
<b>9.4</b> Network-addresses and network-PAI	14
<b>9.5</b> (N)-addresses and (N)-PAI above the Network Layer	14
<b>9.6</b> Obtaining (N)-PAI	15
<b>10</b> (N)-Directory functions	15
<b>10.1</b> Introduction	15
<b>10.2</b> The initiator (N)-directory-functions	15
<b>10.3</b> The recipient (N)-directory-functions	16
<b>11</b> Addressing in specific OSI layers	17
<b>11.1</b> Application processes and the Application Layer	17
<b>11.2</b> Presentation Layer	18
<b>11.3</b> Session Layer	19
<b>11.4</b> Transport Layer	20
<b>11.5</b> Network Layer	20
<b>11.6</b> Data Link Layer	22
<b>11.7</b> Physical Layer	22
<b>12</b> Naming domains and authorities	23
<b>13</b> Registration procedures for naming within OSI	23
<b>14</b> Directory facility requirements	24
<b>14.1</b> Introduction	24
<b>14.2</b> The Application Title Directory Facility	24
<b>14.3</b> The Network Address Directory Facility	24
