

AS/NZS 1554.1:2011

AS/NZS 1554.1:2011

Australian/New Zealand Standard™

Structural steel welding

Part 1: Welding of steel structures

AS/NZS 1554.1:2011

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee WD-003, Welding of Structures. It was approved on behalf of the Council of Standards Australia on 18 May 2011 and on behalf of the Council of Standards New Zealand on 1 June 2011.

This Standard was published on 17 June 2011.

The following are represented on Committee WD-003:

Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Steel Institute
AUSTROADS
Bureau of Steel Manufacturers of Australia
New Zealand Heavy Engineering Research Association
New Zealand Non-destructive Testing Association
Steel Reinforcement Institute of Australia
The University of Sydney
Welding Technology Institute of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

AS/NZS 1554.1:2011

Australian/New Zealand Standard™

Structural steel welding

Part 1: Welding of steel structures

Originated in Australia as AS CA8—1933.
Originated in New Zealand, in part, as NZS 4701:1981.
Previous edition AS/NZS 1554.1:2004.
Eighth edition 2011.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WD-003, Welding of Structures, to supersede AS/NZS 1554.1:2004.

The objective of this Standard is to provide rules for the welding of a wide range of steel constructions and while it is expected that its main use will be for statically loaded welds, it applies also to some welds subject to fatigue. Although this Standard has been specifically prepared for steel structures, it may be usefully applied to machine frames and other types of steel constructions.

This edition incorporates the following major changes to the 2004 edition:

(a) *Amendments to the following Clauses:*

1.2, 1.7 (new title), 1.7.1 (new), 2.1(c), 2.3.1, 3.2.5 (new paragraph), 4.1.2(d)(f)(h)(j)(k) (new sub clauses), 4.1.2 (k), 4.2 (b), 4.6.1.1, 4.6.1.3 (new), 4.10 (new note), 4.12.2, 5.1.1 (new note), 5.1.2 (note added), 5.3.3 (second paragraph—new), 5.3.4 (note added), 5.3.5 (new), 5.7.1 (note added), 6.4.3 (note added), 7.2(a) (new), 7.3 (first paragraph—new), Appendix F (new), Appendix G (new).

(b) *Amendments to the following Tables:*

4.6.1(A), 4.6.1(B), 4.6.1(C), 4.6.2, 4.7.1 (new notes, notes 1 and 3 amended), 4.11(D) (new), 4.11(A) (items b, e, o, u), 4.11(C) item (d), 4.12.2.3 (A), 4.12.2.3(B) (new), 5.3.4(A), B1 (new steel types added), E4 (items deleted).

(c) *Amendments to the following Figure:*

3.2.5(c) (new).

The Standard requires that weld preparations, welding consumables and welding procedures be qualified before commencement of welding. Prequalified joint preparations, welding consumables and welding procedures are also given in the Standard.

The Standard, in catering for structures subject to fatigue conditions as well as statically loaded structures, provides two categories of welds with two differing levels of weld quality assurance associated with the different types of service to which the welds are subjected. The intention is that the designer select the category suited to the severity of the service and nominate this on the drawings. Where a structure contains both categories, this nomination of appropriate categories will ensure that appropriate levels of supervision and inspection will be applied to the relevant parts of the structure.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 EXCLUSIONS	6
1.3 INNOVATION	6
1.4 NORMATIVE REFERENCES	6
1.5 DEFINITIONS AND SYMBOLS	6
1.6 WELD CATEGORIES	7
1.7 MANAGEMENT OF QUALITY	7
1.8 SAFETY	8
SECTION 2 MATERIALS OF CONSTRUCTION	
2.1 PARENT MATERIAL	9
2.2 BACKING MATERIAL	9
2.3 WELDING CONSUMABLES	9
SECTION 3 DETAILS OF WELDED CONNECTIONS	
3.1 GENERAL	11
3.2 BUTT WELDS	11
3.3 FILLET WELDS	12
3.4 COMPOUND WELDS	16
3.5 SEAL WELDS	17
3.6 PLUG WELDS	18
3.7 SLOT WELDS	18
3.8 COMBINING STEEL SECTIONS	18
SECTION 4 QUALIFICATION OF PROCEDURES AND PERSONNEL	
4.1 QUALIFICATION OF WELDING PROCEDURE	20
4.2 METHODS FOR QUALIFYING A WELDING PROCEDURE	22
4.3 PREQUALIFIED WELDING PROCEDURES	22
4.4 PORTABILITY OF QUALIFIED WELDING PROCEDURES	23
4.5 PREQUALIFIED JOINT PREPARATIONS	23
4.6 QUALIFICATION OF WELDING CONSUMABLES	30
4.7 QUALIFICATION OF WELDING PROCEDURE BY TESTING	38
4.8 EXTENSION OF QUALIFICATION	42
4.9 COMBINATION OF PROCESSES	43
4.10 RECORDS OF TESTS	43
4.11 REQUALIFICATION OF WELDING PROCEDURES	43
4.12 QUALIFICATION OF WELDING PERSONNEL	47
SECTION 5 WORKMANSHIP	
5.1 PREPARATION OF EDGES FOR WELDING	51
5.2 ASSEMBLY	51
5.3 PREHEATING AND INTER-RUN CONTROL	52
5.4 WELDING UNDER ADVERSE WEATHER CONDITIONS	59
5.5 TACK WELDS	59
5.6 WELD DEPTH-TO-WIDTH RATIO	59
5.7 CONTROL OF DISTORTION AND RESIDUAL STRESS	60
5.8 BACKGOUGING AND REPAIR OF DEFECTS IN WELDS	61
5.9 TEMPORARY ATTACHMENTS	62
