

## **Fire detection and alarm systems**

### **Part 6: Carbon monoxide fire detectors using electro-chemical cells**

AS 7240.6:2017

This Australian Standard® was prepared by Committee FP-002, Fire Detection, Warning, Control and Intercom Systems. It was approved on behalf of the Council of Standards Australia on 26 June 2017.

This Standard was published on 15 August 2017.

The following are represented on Committee FP-002:

- Association of Hydraulic Services Consultants Australia
- Australasian Fire and Emergency Service Authorities Council
- Australian Chamber of Commerce and Industry
- Australian Industry Group
- Australian Institute of Building Surveyors
- CSIRO
- Deafness Forum of Australia
- Department of Health and Human Services (Vic)
- Engineers Australia
- Fire Protection Association Australia
- National Electrical and Communications Association
- National Fire Industry Association
- Property Council of Australia
- Society of Fire Safety

This Standard was issued in draft form for comment as DR AS 7240.6:2017.

## Preface

This Standard was prepared by the Standards Australia Committee FP-002, Fire Detection, Warning, Control and Intercom Systems to supersede AS 7240.6:2006, *Fire detection and alarm systems, Part 6: Carbon monoxide fire detectors using electro-chemical cells*.

The objective of this Standard is to specify requirements, test methods and performance criteria for point-type fire detectors using an electrochemical-cell carbon-monoxide sensor, for use in fire detection and alarm systems.

This Standard is identical with, and has been reproduced from, ISO 7240-6:2011, *Fire detection and alarm systems — Part 6: Carbon monoxide fire detectors using electro-chemical cells*.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text 'this International Standard' should read 'Australian Standard';
- (b) A full point substitutes for a coma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms 'normative' and 'informative' are used in Standards to define the application of the appendices or annexes to which they apply. A 'normative' appendix or annex is an integral part of a Standard, whereas an 'informative' appendix or annex is only for information and guidance.
