

AS 1271—2003
(Incorporating Amendment No. 1)

AS 1271—2003

Australian Standard™

**Safety valves, other valves, liquid level
gauges and other fittings for boilers and
unfired pressure vessels**

This Australian Standard was prepared by Committee ME-001, Pressure Equipment. It was approved on behalf of the Council of Standards Australia on 30 June 2003. This Standard was published on 18 August 2003.

The following are represented on Committee ME-001:

A.C.T. WorkCover
Australasian Institute of Engineer Surveyors
Australian Aluminium Council
Australian Building Codes Board
Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Institute for the Certification of Inspection Personnel
Australian Institute of Energy
Australian Institute of Petroleum
Australian Liquefied Petroleum Gas Association
Boiler and Pressure Vessel Manufacturers Association of Australia
Bureau of Steel Manufacturers of Australia
Department for Administrative and Information Services, S.A.
Department of Consumer & Employment Protection, WorkSafe Division, W.A.
Department of Infrastructure, Energy and Resources, Tas.
Electricity Supply Association of Australia
Institute of Materials Engineering Australasia Limited
Institution of Engineers Australia
Insurance Council of Australia Ltd
National Association of Testing Authorities, Australia
Victorian WorkCover Authority
Welding Technology Institute of Australia
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

AS 1271—2003

PREFACE

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee ME-001, Pressure Equipment to supersede AS 1271—1997. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian, rather than an Australian/New Zealand Standard.

This Standard incorporates Amendment No. 1 (July 2004). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The Committee's intention is to consolidate all valve requirements used for pressure equipment within the Committee's scope into one document. This has been achieved by incorporating some parts of AS 3653—1993, *Boiler—Safety, management, combustion and other ancillary equipment*, into this Standard.

The remainder of AS 3653 will be superseded by a proposed new Standard to cover the areas of unattended, limited attendance and attended boilers and on publication of the new Standard, AS 3653 will be withdrawn.

Other Australian Boiler Standards will reflect these changes as they are revised.

The objective of this Standard is to specify clear, uniform and safe requirements for the design, construction and testing of safety valves, other valves, liquid level gauges, blowdown valves and other fittings for use on boilers and unfired pressure vessels, and their associated piping.

Users of this Standard are reminded that it has no legal authority in its own right but may acquire legal standing in one or more of the following circumstances:

- (a) Adoption by a government or other authority having jurisdiction.
- (b) Adoption by a purchaser as the required standard of construction when placing a contract.
- (c) Adoption where a manufacturer states that a product is in accordance with this Standard.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 APPLICATION	5
1.3 REFERENCED DOCUMENTS	5
1.4 DEFINITIONS	6
1.5 PRESSURES	6
1.6 DESIGNATION	6
SECTION 2 GENERAL VALVE DESIGN, CONSTRUCTION AND APPLICATION	
2.1 MATERIALS	7
2.2 CONSTRUCTION.....	8
2.3 PRESSURE/TEMPERATURE DESIGN AND RATING.....	8
2.4 VALVE MOUNTING AND CONNECTIONS.....	9
2.5 MARKING AND DOCUMENTATION.....	10
2.6 HYDROSTATIC TESTS.....	12
SECTION 3 SAFETY AND RELIEF VALVES	
3.1 GENERAL	14
3.2 SPRING LOADING	14
3.3 EASING GEAR.....	15
3.4 OPERATION.....	16
3.5 CAPACITY RATING, CLASSIFICATION, AND CERTIFICATION	16
3.6 TESTING FOR OPERATING AND FLOW CHARACTERISTICS FOR SAFETY VALVES USING STEAM, AIR, WATER, OR OTHER GASES OR LIQUIDS OF KNOWN CHARACTERISTICS	17
3.7 TESTS TO DETERMINE OPERATING CHARACTERISTICS	18
3.8 TESTS TO DETERMINE FLOW CHARACTERISTICS	19
3.9 MEASUREMENT OF LIFT	20
3.10 RATED DISCHARGE CAPACITY	21
SECTION 4 LIQUID RELIEF VALVES	
4.1 GENERAL	24
4.2 RATED DISCHARGE CAPACITY	24
SECTION 5 LIQUID LEVEL GAUGES	
5.1 SCOPE OF SECTION	25
5.2 MOUNTINGS	25
5.3 GAUGE GLASSES	25
5.4 DRAIN	25
5.5 COCK HANDLES.....	25
5.6 GUARDS.....	25
5.7 SAFETY DEVICES	25
5.8 CONNECTION TO PRESSURE VESSEL.....	26
SECTION 6 BLOWDOWN VALVES	
6.1 DESIGN	27
6.2 OPERATION.....	27
